

The models and dimensions

The definitive guide to the definitive kitchen

The world of Gaggenau is within your hands.

Our products perform exceptionally, are technologically advanced, built without compromise and designed to be appreciated by both the hand and the eye.

This comprehensive handbook will enable the smooth, we would not say effortless, creation of the kitchen for your client. It is all here, clearly and cleanly presented, easy to find and utterly complete. See for yourself.

The difference is Gaggenau.

EB 333 111

Stainless steel

Width 90 cm

Included in the price

- 1 baking tray, enamelled pyrolysis-safe
- 1 rotisserie spit
- 1 wire rack
- 1 grill tray with wire rack
- 1 plug-in core temperature probe

Special accessories

BA 018 105

Pull-out system Fully extendable telescopic rails and

enamelled cast iron frame. BA 028 115

Baking tray, enamelled

30 mm deep.

BA 038 105 Wire rack, chromium-plated

Without opening, with feet. BA 058 115

Heating element for baking stone and Gastronorm roaster.

BA 058 133

Baking stone. Incl. baking stone support and pizza

paddle (heating element must be

ordered separately).

Not in combination with pull-out system.

BA 090 100

Black rotary knobs for EB 333, set of 2 Stainless steel knobs with black

coating. BS 020 002

Pizza paddle, set of 2.

GN 340 230

Gastronorm roaster in cast aluminium. GN 2/3, height 165 mm, non-stick.

Oven EB 33

- One-piece front-hinged door with 3 mm precision crafted stainless steel front door panel
- Cushioned door opening and closing system
- Diagonally positioned light sources for optimal interior lighting
- Pyrolytic system
- 17 heating methods with core temperature probe, rotisserie spit and baking stone function
- Automatic programmes
- Core temperature probe with estimation of cooking time
- Hot air fan rotates in both directions for ideal heat distribution
- TFT touch display
- Panel-free appliance with control
- module behind glass Electronic temperature control from
- 30 °C to 300 °C - Net volume 83 litres
-

Heating methods

Hot air Eco hot air Top + bottom heat. Top + 1/3 bottom heat. Top heat. 1/3 top + bottom heat. Bottom heat. Hot air + bottom heat. Hot air + 1/3 bottom heat. Full surface grill + circulated air. Full surface grill. Compact grill. Baking stone function. Roaster function. Dough proofing. Defrosting. Keeping warm.

Handling

Rotary knob and TFT touch display operation. Clear text display. Option to save individual recipes (incl. core temperature probe). Personalisation of automatic programmes. Information key with use indicators. Front-hinged door with 90° door opening angle.

Features

Three-point core temperature probe with automatic shut-off and estimation of cooking time. Automatic programmes. Rotisserie spit. Baking stone socket. Actual temperature display. Rapid heating. Timer functions: cooking time, cooking time end, timer, stopwatch, long-term timer (certified by Star-K). 60 W halogen light on the top. 2x10 W halogen light on the side. Enamelled side shelf supports with 3 tray levels, pyrolysis-safe.

Selected digital services

(Home Connect) Automatic programmes. Remote control and monitoring. Recipes.

Please read additional information on Home Connect on page 411.

Safety

Thermally insulated door with quintuple glazing. Child lock. Safety shut-off. Cooled housing with temperature protection.

Cleaning

Pyrolytic system. Gaggenau enamel. Heated catalyser to clean the oven air.

Planning notes

The door panel surface of the appliance extends 40 mm from the furniture cavity. The outer edge of the door handle extends 90 mm from the furniture cavity. For installation underneath cooktops: Distance between the underside of the cooktop and the top edge of the oven cavity: min. 15 mm. The planning notes for the cooktops (particularly regarding ventilation, gas/electric connection) must be taken into account. To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the corner of the housing.

The mains socket needs to be planned outside the built-in niche.

The LAN port can be found at the back on the upper left side.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Total connected load 5.4 kW. Plan a connection cable. Plan a LAN cable.

measurements in mm

5

Advice: Not every illustrated accessory fits to every oven. For exact allocation see page 6.

BA 090 100 Stainless steel knobs with black coating.

BA 018 105 Pull-out system Fully extendable telescopic rails and enamelled cast iron frame.

BA 028 115 Baking tray, enamelled 30 mm deep.

BA 038 105

Wire rack, chromium-plated Without opening, with feet.

Heating element for baking stone and

BA 058 133

Checklist for appliance combinations 400 series

This checklist provides the most relevant parameters for the perfect combination and ordering of ovens, Combi-steam ovens, Combi-microwave ovens, fully automatic espresso machine, vacuuming drawers, warming drawers and dishwashers.

In general:

- All appliances shown can be obtained with stainless-steelbacked full glass doors.
- □ When several appliances are listed (BS/BM and DV/WS), the first appliance is shown.

Vertical combinations

When planning and ordering please note that

- ☐ The door hinges of the appliances must be on the same side.
- □ The door hinge (right-/left-hinged) is not reversible.
- ☐ The width of the appliances is identical
- ☐ The control modules of the two appliances should meet each other in the middle of the combination.
- □ No further appliances may be fitted above the BS.
- Only appliances with controls at the top can be installed above a dishwasher. The niche for appliances that are installed above it must be 56 cm wide. The dishwasher is 60 cm wide. A stainlesssteel-backed full glass door can be obtained as a special accessory.

Horizontal combinations

When planning and ordering please note that

- ☐ The door hinges need to be placed on the outside in order to use the full available door opening angle.
- ☐ The door hinge (right-/left-hinged) is not reversible.
- A minimum clearance of 10 mm between the two doors must be observed.
- Combi-steam ovens, Combi-microwave ovens and fully automatic espresso machine in combination with a vacuuming drawer or a warming drawer (14 cm in height) have the same total height as a 60 cm wide oven.
- ☐ The control modules are either all at the top or all at the bottom.
- BO Ovens
- BS Combi-steam ovens
- BM Combi-microwave ovens
- CM Fully automatic espresso machine
- DV Vacuuming drawers
- WS Warming drawers

• CM 450

Ovens 400 series

Planning notes for the installation of ovens and oven combinations 400 and 200 series

General notes

Installation behind kitchen furniture doors

Appropriate measures must be taken to prevent these types of doors from closing when the appliance is heating or while it is cooling down (fan operation).

Installation side by side

When appliances are installed side by side, the clearance between the appliances must be at least 10 mm (corresponds to the standard outside measurement of the furniture cavity of 600 or 762 mm). The door hinges need to be placed outside in order to use the full available door opening angle.

Combination of ovens and

Vario cooling 400 series appliances Please check the planning notes in the information for Vario cooling 400 series appliances in order to prevent the refrigerator door from colliding with the oven.

Necessary air cross section at the door edges

Gaggenau ovens are cooled with fresh air at the top edge and side edges of the door. Hot air is blown out at the door bottom edge. Combi-steam ovens and Combi-microwave ovens have the air inlet at the side edges of the door and the hot air and steam outlets at the top edge of the door. In order to prevent appliances from overheating and to ensure that they cool down as required after operation, appropriate minimum cross sections of free space must be maintained from kitchen furniture edges.

The measurements given in the drawing apply to all appliances. The following must also be observed:

The area above the appliances **BS**:

No other electrical appliances should be installed above the BS. It is recommended that a horizontal handle is not fitted on furniture above the BS.

Where the edge of a kitchen unit protrudes more than 20 mm from the front edge of the furniture cavity, the edge of the kitchen furniture panel must be steam resistant as is the case above a dishwasher. Steam may possibly penetrate into the compartment.

The area below the appliances DV / WS:

It must be ensured that there is sufficient access to the lower edge of the vacuuming drawer and warming drawer, if the thickness of the kitchen furniture door is greater than 20 mm in front of the furniture cavity.

In cases where kitchen furniture door thicknesses are greater or where sidewalls protrude up to 34 mm from front of the edge of the furniture cavity, the minimum distance on the hinge side is sufficient for the air supply and a door opening angle of 120°. Above that, a distance of 10 mm or even more is required.

The handle side may, if required, be covered by a side panel provided that the minimum distance is maintained.

Air inlet cross section at the door edges

Included in the price

2 baking trays, enamelled pyrolysis-safe

- 1 rotisserie spit
- 2 wire racks
- 2 grill trays with wire rack
- 1 plug-in core temperature probe

Special accessories

BA 018 105

Pull-out system Fully extendable telescopic rails and enamelled cast iron frame.

BA 028 115 Baking tray, enamelled

30 mm deep.

BA 038 105

Wire rack, chromium-plated Without opening, with feet.

BA 058 115

Heating element for baking stone and Gastronorm roaster.

BA 058 133

Baking stone.

Incl. baking stone support and pizza paddle (heating element must be ordered separately).

Not in combination with pull-out system. BS 020 002

Pizza paddle, set of 2.

GN 340 230

Gastronorm roaster in cast aluminium. GN 2/3, height 165 mm, non-stick.

Cleaning

Pyrolytic system. Gaggenau enamel.

Double oven 400 series BX 480/BX 481

- Pyrolytic system

- 17 heating methods with core temperature probe, rotisserie spit and baking stone function
- Core temperature probe with estimation of cooking time
- TFT touch display _
- Electronic temperature control from 30 °C to 300 °C
- 2x110 litres net volume

Heating methods

Hot air. Eco hot air. Top + bottom heat. Top + 1/3 bottom heat. Top heat. 1/3 top + bottom heat. Bottom heat. Hot air + bottom heat Hot air + 1/3 bottom heat. Full surface grill + circulated air. Full surface grill. Compact grill. Baking stone function. Roaster function. Dough proofing. Defrosting. Keeping warm.

Handling

Rotary knob and TFT touch display operation. . Clear text display. Information key with use indicators. Side-opening door opens up to 180° angle.

Features

Three-point core temperature probe with automatic shut-off and estimation of cooking time. Rotisserie spit (lower oven). Baking stone socket. Actual temperature display. Rapid heating. Timer functions: cooking time, cooking time end, timer, stopwatch, long-term timer (certified by Star-K). 60 W halogen light on the top. 10W halogen light on the side. Enamelled side shelf supports with 5 tray levels, pyrolysis-safe.

Safety

Thermally insulated door with quadruple glazing. Child lock. Safety shut-off. Cooled housing with temperature protection.

Heated catalyser to clean the oven air.

Planning notes

Door hinge not reversible. The facade of the appliance extends 47 mm from the furniture cavity. Consider the overhang when planning to open drawers next to the appliance. When planning a corner solution, pay attention to the side-opening door and the minimum required distance to the wall.

To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the lower right hand corner of the housing. The mains socket needs to be planned outside the built-in niche.

Please read the installation details regarding oven combination on page 14 – 15.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D.

Total connected load 9.2 kW. Plan a connection cable.

Safety

Child lock Safety shut-off. Cooled housing with temperature protection.

Cleaning

Cleaning programme, fully automatic. Descaling programme for the steam generator. Drying programme. Automatic drying of the cavity at the end of the cooking process. Strainer filter, removable. Demo cleaning programme.

Planning notes

Door hinge not reversible. No other electrical appliances should be installed above the BS. At no point may the outlet hose be positioned higher than the bottom edge of the appliance. The outlet hose must also be at least 100 mm lower than the appliance outlet (see drawing "drainage connection"). Inlet hose can be extended once. The outlet hose must not be longer than a maximum of 5 m The water connection (1) for the inlet hose must always be accessible and not located directly behind the appliance. The connection of the outlet hose to the siphon (2) must not be directly behind the appliance and should be accessible. The descaling system GF 111 100 (3) may be installed when connecting the appliance if the water hardness exceeds 7° dH.

The facade of the appliance extends 47 mm from the furniture cavity. Consider the overhang when planning to open drawers next to the appliance. When planning a corner solution, pay attention to the side-opening door and the minimum required distance to the wall.

The mains socket needs to be planned outside the built-in niche.

Special accessories (order as spare parts): Part No. 17002490 Descaling tablets

Please read the installation details regarding oven combination on page 14 - 15.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Total connected load 3.15 kW. Connecting cable 1.8 m with plug. Plan a LAN cable. Inlet hose 3,0 m with connection pipe thread ISO228-G 3/4" (Ø 26,4 mm) extendable. Outlet hose (Ø 25 mm) 3,0 m (HT-Hose).

Safety

Child lock. Safety shut-off. Cooled housing with temperature protection.

Cleaning

Cleaning programme, fully automatic. Descaling programme for the steam generator. Drying programme. Automatic drying of the cavity at the end of the cooking process. Strainer filter, removable. Demo cleaning programme.

Planning notes

Door hinge not reversible. No other electrical appliances should be installed above the BS. At no point may the outlet hose be positioned higher than the bottom edge of the appliance. The outlet hose must also be at least 100 mm lower than the appliance outlet (see drawing "drainage connection"). Inlet hose can be extended once. The outlet hose must not be longer than a maximum of 5 m The water connection (1) for the inlet hose must always be accessible and not located directly behind the appliance. The connection of the outlet hose to the siphon (2) must not be directly behind the appliance and should be accessible. The descaling system GF 111 100 (3) may be installed when connecting the appliance if the water hardness exceeds 7° dH. The facade of the appliance extends

47 mm from the furniture cavity. Consider the overhang when planning to open drawers next to the appliance. When planning a corner solution, pay attention to the side-opening door and the minimum required distance to the wall.

The mains socket needs to be planned outside the built-in niche.

Special accessories (order as spare parts): Part No. 17002490 Descaling tablets

Please read the installation details regarding oven combination on page 14 – 15.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Total connected load 3.15 kW. Connecting cable 1.8 m with plug. Plan a LAN cable. Inlet hose 3,0 m with connection pipe thread ISO228-G 3/4" (Ø 26,4 mm) extendable. Outlet hose (Ø 25 mm) 3,0 m (HT-Hose).

A: Only required if the water hoses for the BS steam oven cannot be accommodated in the corner recesses of the appliances.

Pull-out system

Pull-out system

Fully extendable telescopic rails and

Fully extendable telescopic rails and enamelled cast iron frame.

Cooking container, stainless steel,

Cooking container, stainless steel, perforated, 40 mm deep, 5 l.

Cooking container, non-stick, unperforated, 46 mm deep, 5.41.

Cooking container, non-stick, perforated, 40 mm deep, 51.

unperforated, 46 mm deep, 5.4 l.

enamelled cast iron frame.

BA 226 105 Grill tray, enamelled 30 mm deep.

BA 056 115 Heating element for baking stone and Gastronorm roaster BA 058 115 Heating element for baking stone and Gastronorm roaster

BA 056 133

Baking stone Incl. baking stone support and pizza paddle (heating element must be ordered separately). Not in combination with pull-out system.

BA 058 133 Baking stone Incl. baking stone support and pizza paddle (heating element must be ordered separately). Not in combination with pull-out system.

BS 020 002

Pizza paddle, set of 2

roaster.

GN 010 330

Adapter for gastronorm insert and

BA 026 115 Baking tray, enamelled 15 mm deep. BA 028 115 Baking tray, enamelled 30 mm deep.

BA 036 105 Wire rack, chromium-plated Without opening, with feet. BA 038 105

Wire rack, chromium-plated Without opening, with feet.

BA 046 117 Glass tray

24 mm deep.

Gastronorm insert, stainless steel, GN 1/3 Unperforated, 40 mm deep, 1.5 l.

GN 114 230 Gastronorm insert, stainless steel, GN 2/3 Unperforated, 40 mm deep, 31.

GN 124 130

Gastronorm insert, stainless steel, GN 1/3 Perforated, 40 mm deep, 1.5 l.

GN 124 230 Gastronorm insert, stainless steel, GN 2/3 Perforated, 40 mm deep, 31.

GN 340 230

Gastronorm roaster in cast aluminium GN 2/3, height 165 mm, non-stick. For roasting in oven with roasting function.

Lower and upper part can also be used as separate ovenproof disches, height 100 and 65 mm. For ovens with heating element BA 056 115 or BA 058 115 and pull-out system BA 016 or BA 018 (both to be ordered separately) and for Combi-steam ovens with adapter GN 010 330 and pull-out system BA 010 301 (both to be ordered separately).

CL S10 040

Cleaning cartridges, set of 4. For Combi-steam oven.

GF 111 100

Descaling and neutralising filter, for first installation. Descaling system, recommended to be installed if water hardness exceeds 7 °dH or carbon hardness 5 °dH. Filter head with integrated non-return valve and filter. Width 130 mm, Height 265 mm, Depth 121 mm. Water inlet 1.5 m with 3/4" connection.

GF 121 110 Filter cartridge

Extension for water inlet and outlet (2 m long).

Checklist for appliance combinations 200 series

This checklist provides the most relevant parameters for the perfect combination and ordering of ovens, Combi-steam ovens, steam ovens, Combi-microwave ovens, microwaves, fully automatic espresso machines, warming drawers and dishwashers.

When several appliances are listed (BSP/BMP), the first appliance is shown.

Vertical combinations

When planning and ordering please note that

- ☐ The door hinges of the appliances must be on the same side.
- The door hinge (right-/left-hinged) is not reversible.
- □ No further appliances may be fitted above the BSP.
- Only appliances with controls at the top can be installed above a dishwasher. The niche for appliances that are installed above it must be 56 cm wide. The dishwasher is 60 cm wide.

Horizontal combinations

When planning and ordering please note that

- ☐ The door hinges can be located on either the inside or outside, without the full door opening angle being restricted.
- The door hinge (right-/left-hinged) cannot be reversed retrospectively.
- A minimum clearance of 10 mm between the two doors must be observed.
- Combi-steam ovens, steam ovens, Combi-microwave ovens, microwaves and fully automatic espresso machines in combination with a warming drawer (14 cm in height) have the same total height as a 60 cm wide ovens.
- BOP Ovens
- BSP Combi-steam ovens/steam ovens
- BMP Combi-microwave ovens/ microwaves
- CMP Fully automatic espresso machine
- WSP Warming drawers
- DF Dishwashers

Please read additional planning notes on page 14 – 15.

1 glass tray

1 wire rack

1 plug-in core temperature probe

Special accessories

BA 016 105

Pull-out system Fully extendable telescopic rails and enamelled cast iron frame.

BA 026 115

Baking tray, enamelled 15 mm deep. BA 036 105

Wire rack, chromium-plated Without opening, with feet.

- BA 046 117 Glass tray
- 24 mm deep
- BA 056 115

Heating element for baking stone and Gastronorm roaster.

BA 056 133

Baking stone. Incl. baking stone support and pizza paddle (heating element must be ordered separately). Not in combination with pull-out

system.

BA 226 105 Grill tray, enamelled 30 mm deep. BS 020 002

Pizza paddle, set of 2. GN 340 230

Gastronorm roaster in cast aluminium. GN 2/3, height 165 mm, non-stick.

Oven 200 series BOP 250/BOP 251

- Flush installation
 - Pyrolytic system
 - 13 heating methods with core temperature probe and baking stone function
 - Automatic programmes
 - Core temperature probe with
- estimation of cooking time - TFT touch display - Panel-free appliance with surf
- Panel-free appliance with surface control module
- Electronic temperature control from 30 °C to 300 °C
- Net volume 76 litres

Heating methods

Hot air. Eco hot air. Top + bottom heat. Top heat. Bottom heat. Hot air + bottom heat. Full surface grill + circulated air. Full surface grill. Compact grill. Baking stone function. Roaster function. Dough proofing. Defrosting.

Handling

Rotary knob and TFT touch display operation. Clear text display. Option to save individual recipes (incl. core temperature probe). Personalisation of automatic programmes. Information key with use indicators. Side-opening door opens up to 110° angle.

Features

Three-point core temperature probe with automatic shut-off and estimation of cooking time. Automatic programmes. Baking stone socket. Actual temperature display. Rapid heating. Timer functions: cooking time, cooking time end, timer, stopwatch, long-term timer (certified by Star-K). 60 W halogen light on the top. Enamelled side shelf supports with 4 tray levels, pyrolysis-safe.

Selected digital services

(Home Connect) Automatic programmes.

Remote monitoring and control. Recipes.

Please read additional information on Home Connect on page 411.

Safety

Thermally insulated door with quintuple glazing. Child lock. Safety shut-off. Cooled housing with temperature protection.

Cleaning

Pyrolytic system. Gaggenau enamel. Heated catalyser to clean the oven air.

Planning notes

Door hinge not reversible. The door panel surface of the appliance extends 21 mm from the furniture cavity. The outer edge of the door handle extends 72 mm from the furniture cavity. Necessary lateral gap between appliance door and furniture panel of

min. 5 mm. Consider the overhang, incl. the door handle, when planning to open drawers next to the appliance. When planning a corner solution, pay attention to the side-opening door

and the minimum required distance to the wall. For installation underneath cooktops:

Distance between the underside of the cooktop and the top edge of the oven cavity: min. 15 mm. The planning notes for the cooktops (particularly regarding ventilation, gas/electric connection) must be taken into account

must be taken into account. To achieve the 550 mm installation

depth, the connection cable needs to follow the slanted edge on the corner of the housing.

The mains socket needs to be planned outside the built-in niche.

The LAN port can be found at the back on the upper right side.

Please read the installation details regarding oven combination on page 14 – 15.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Total connected load 3.7 kW. Plan a connection cable. Plan a LAN cable.

Safety

Child lock. Safety shut-off. Cooled housing with temperature protection.

Cleaning

Cleaning programme, fully automatic. Descaling programme for the steam generator. Drying function. Automatic drying of the cavity at the end of the cooking process. Strainer filter, removable. Demo cleaning programme.

Planning notes

Door hinge not reversible. No other electrical appliances should be installed above the BS. At no point may the outlet hose be positioned higher than the bottom edge of the appliance. The outlet hose must also be at least 100 mm lower than the appliance outlet (see drawing "drainage connection"). Inlet hose can be extended once.

The outlet hose must not be longer than a maximum of 5 m.

The water connection (1) for the inlet hose must always be accessible and not located directly behind the appliance. The connection of the outlet hose to the siphon (2) must not be directly behind the appliance and should be accessible. The descaling system GF 111 100 (3) may be installed when connecting the appliance if the water hardness exceeds 7° dH.

The door panel surface of the appliance extends 21 mm from the furniture cavity. The outer edge of the door handle extends 72 mm from the furniture cavity. Necessary lateral gap between appliance door and furniture panel of min. 5 mm.

Consider the overhang, incl. the door handle, when planning to open drawers next to the appliance.

When planning a corner solution, pay attention to the side-opening door and the minimum required distance to the wall.

The mains socket needs to be planned outside the built-in niche.

Steam oven 200 Series BSP 220/BSP 221

Flush installation

- Water tank
- Large cavity
- LED light source
- External steam generationSteaming without pressure with
- 100% humidity from 30 °C to 100 °C
- Sous-vide cooking with accurate temperature regulation
- TFT touch display
- Panel-free appliance with surface control module
- Electronic temperature control from
- 30 °C bis 100 °C
- Net volume 59 litres

Heating methods

100 % humidity. Sous-vide cooking. Dough proofing. Defrosting. Regenerating. Low temperature steaming.

Handling

Rotary knob and TFT touch display operation. Clear text display. Information key with use indicators. Side-opening door opens up to 110° angle.

Features

Removable 1.7 litre water tank. Water level warning. Actual temperature display. Timer functions: cooking time, cooking time end, timer, stopwatch, long-term timer (certified by Star-K). Automatic boiling point detection. LED light on the side. Hygienic stainless steel cooking interior. 3 tray levels.

Selected digital services

(Home Connect) Remote control and monitoring. Recipes.

Please read additional information on Home Connect on page 411.

Safety

Child lock. Safety shut-off. Cooled housing with temperature protection.

Cleaning

Cleaning aid. Descaling programme for the steam generator.

Planning notes

Door hinge not reversible. No other electrical appliances should be installed above the BS. The door panel surface of the appliance extends 21 mm from the furniture cavity. The outer edge of the door handle extends 72 mm from the furniture cavity. Necessary lateral gap between appliance door and furniture panel of min. 5 mm. Consider the overhang, incl. the door handle, when planning to open drawers next to the appliance. When planning a corner solution, pay attention to the side-opening door and the minimum required distance to the wall.

The mains socket needs to be planned outside the built-in niche. The LAN port can be found at the back

The LAN port can be found at the back on the lower left side.

Special accessories (order as spare parts):

Part No. 17002490 Descaling tablets

Please read the installation details regarding oven combination on page 14 – 15.

Connection

Total connected load 2.75 kW. Connecting cable 1.8 m with plug. Plan a LAN cable.

• Standard. - Not available.

¹ Appliance depth: the immersion depth of the appliance in the niche.

² Special accessory, see pages 78-81.

³ The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country.

 * Energy efficiency class: at a range of energy efficiency classes from A+++ to D.

regulation within pots GN 232 110 Teppan Yaki plate made of multi ply material, GN 1/1 For full surface induction cooktops. GN 232 230 Teppan Yaki plate made of multi ply material, GN 2/3 For full surface induction cooktops.

Full surface induction cooktop 400 series CX 492

- One single big cooking surface
- Free positioning of cookwareAll sizes and formats of cookware
- can be used - TFT touch display for an intuitive
- control of all functions - Cooking sensor function for
- temperature control in pots - Professional cooking functions
- Max. power output for big cookware of up to 5.5 kW
- Precision crafted 3 mm stainless steel
- For surface mounting with a visible edge or for flush mounting
- Can be combined perfectly with other Vario appliances of the 400 series

Cooking zones

One unique cooking surface of 3200 cm². Up to 6 items of cookware can be placed simultaneously on the cooktop.

Handling

Easy to use colour graphic TFT touch display with use indications. Electronic power control in 17 output levels.

Features

Cooking sensor function. Professional cooking function. Dynamic cooking function. Teppan Yaki function. Booster function for pots. Booster function for pans. Keep warm function. Individual pot detection. Cooking timer for each cooking position. Stopwatch. Short-term timer. Information key with use indicators. Power management.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable ventilation). Remote monitoring. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Safety

Main switch. Residual heat indication. Child lock. Safety shut-off. Pause function.

Planning notes

Depending on the type of installation (surface-mounted or flush-mounted), the specific definition of the cut-out must be observed. If combining several Vario appliances of the 400 series, select combinations with or without appliance cover, and a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 and 132.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs. Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400 001 cannot be used with this appliance. Appliance can be snapped into the worktop from above. Appliance weight: approx. 31 kg.

Appliance weight: approx. 3 i kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 7.4 kW. Connecting cable 1.5 m without plug. Power consumption standby/ display off 0.5 W. Power consumption standby/ network 2.0 W. Please check the user manual for how to switch off the WiFi module.

Operation indicator. Pot detection. 2-stage residual heat indication. Safety shut-off.

Planning notes

The horizontal positioning of the knobs may be aligned with the specific cooking areas. The drawing "Installation of the control knob" must be observed if the panel is more than 23 mm thick (there must be a recess at the rear).

The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 – 133.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs. Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400 001 cannot be used with this appliance. Appliance can be snapped into the worktop from above.

Appliance weight: approx. 17 kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 7.4 kW. Connecting cable 1.5 m without plug. Power consumption standby/display off 0.5 W.

Power consumption standby/network 1.7 W.

Please check the user manual for how to switch off the WiFi module. Length of connection cable, water in- and outlet see detailed drawing on page 107.

Safety

Operation indicator. Pot detection. 2-stage residual heat indication. Safety shut-off.

Planning notes

Depending on the type of installation (surface-mounted or flush-mounted), the specific location of the cut-out and the knob positions may vary.

The horizontal positioning of the knobs may be aligned with the specific cooking areas.

The drawing "Installation of the control knob" must be observed if the panel is more than 23 mm thick (there must be a recess at the rear). If combining several Vario appliances of the 400 series, select combinations with or without appliance cover, and a connection strip VA420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided.

The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 – 133.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs. Operates with magnetic (induction) iron pots and pans only. For an optimal

heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400 001 cannot be used with this appliance. Appliance can be snapped into the

worktop from above.

Appliance weight: approx. 17 kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 7.4 kW. Connecting cable 1.5 m without plug. Power consumption standby/display off 0.5 W.

Power consumption standby/network 1.7 W.

WP 400 001 Wok pan made of multiple-layer material With round bottom and handle,

ø36 cm, 6 litres, height 10 cm.

Vario gas cooktop 400 series VG 491

- Five multi-ring burners, up to 18 kW
 Full electronic power level
- regulation on 12 levels - Solid stainless steel knob, also selectable with black robust finishing, for precise control and
- personalisation Precision crafted 3 mm stainless steel
- For surface mounting with a visible edge or for flush mounting
- Precise and reproducible flame size
 Automatic fact ignition clastronic
- Automatic fast ignition, electronic flame monitoring with automatic re-ignition
- Simmer function for cooking on a very low output level
- Solid smooth-surface cast iron pan supports
- Can be combined perfectly with other Vario appliances of the 400 series

Cooking zones

VG 491 115F 1 multi-ring wok burner (300 – 5800), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (165 – 4000), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (165 – 2000), suitable for pots up to max. ø 24 cm.

VG 491 115

1 multi-ring wok burner (300 – 5800), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (165 – 4000), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (165 – 2000), suitable for pots up to max. ø 24 cm.

VG 491 215

1 multi-ring wok burner (300 – 6000), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (165 – 4000), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (165 – 2000), suitable for pots up to max. ø 24 cm.

Handling

Control knobs with illuminated ring, cooking zone and output level markings. One-handed operation. Full electronic control in 12 output levels for exact power level regulation plus simmer function. Automatic fast ignition.

Features

Simmer function. Three-part cast iron pan support with flat, continuous pot surface. Brass burner rings.

Safety

Electronic flame monitoring with automatic re-ignition. Residual heat indication. Safety shut-off.

Planning notes

Depending on the type of installation (surface-mounted or flush-mounted, with or without an appliance cover), the specific location of the cut-out and the knob positions may vary.

The horizontal positioning of the knobs may be aligned with the specific burners. The drawing "Installation of the control knob" must be observed if the panel is more than 23 mm thick (there must be a recess at the rear).

If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thin worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 – 133.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs. Special nozzles can be ordered as spare parts. Plan for an electrical connection (the appliance is not operable without power supply). Air intake from above. No intermediate shelf required. Rear panel and wall trims must be heat-resistant and consist of a non-flammable material. A minimum lateral clearance of at least 300 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. Installation in a 90 cm wide lower cabinet is required. With a total connected load of more than 11 kW local regulations concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed. The minimum distance between the cooktop surface and a cabinet above, out of combustible material, needs to

be 76 cm. The minimum distance to a ventilation above is shown at the planning hints for the individual ventilation product. The combination with VL 414 is not recommended, since the air extraction from the centre burner cannot be guaranteed due to the distance. Appliance can be snapped into the worktop from above.

Appliance weight: approx. 31.

Connection

Total connected load gas 17.8/18.0 kW. Total connected load electric 15.0/15.0 W. Connecting cable 1.4 m with plug.

 Automatic fast ignition, electronic
- flame monitoring with automatic re-ignition
- Simmer function for cooking on a very low output level
- Can be combined perfectly with other Vario appliances of the 400 series

Cooking zones

VG 415 115F 1 multi-ring wok burner (300 W – 5800 W), suitable for pots up to max. ø 32 cm.

VG 415 115

1 multi-ring wok burner (300 W - 5800 W), suitable for pots up to max. ø 32 cm.

VG 415 215

1 multi-ring wok burner (300 W - 6000 W), suitable for pots up to max. ø 32 cm.

Handling

Control knobs with illuminated ring, cooking zone and output level markings. One-handed operation. Full electronic control in 12 output levels for exact power level regulation plus simmer function. Automatic fast ignition.

Features

Simmer function. Cast iron pan support with flat, continuous pot surface. Brass burner rings.

Safety

Electronic flame monitoring with automatic re-ignition. Residual heat indication. Safety shut-off.

Planning notes

- Depending notes Depending on the type of installation (surface-mounted or flush-mounted, with or without an appliance cover), the specific location of the cut-out and the knob positions may vary. The drawing "Installation of the control knob" must be observed if the panel is more than 23 mm thick (there must be a recess at the rear). If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided.
- The bearing capacity and stability, in the case of thin worktops in particular, must be supported using suitable

substructures. Take into account the appliance weight and additional loads. Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer.

The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 – 133.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs.

Special nozzles can be ordered as spare parts.

Plan for an electrical connection (the appliance is not operable without power supply).

Air intake from above.

No intermediate shelf required. Rear panel and wall trims must be heat-resistant and consist of a non-flammable material.

A minimum clearance of at least 150 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. If operated next to the downdraft ventilation VL 414, the ventilation moulding AA 414 is recommended to ensure maximum performance of the cooktop.

With a total connected load of more than 11 kW local regulations concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed. The minimum distance between the cooktop surface and a cabinet above, out of combustible material, needs to be 70 cm.

The minimum distance to a ventilation above is shown at the planning hints for the individual ventilation product. Appliance can be snapped into the worktop from above. Appliance weight: approx. 15 kg.

Connection

Total connected load gas 5.8/6.0 kW. Total connected load electric 15.0/15.0 W. Connecting cable 1.4 m with plug.

Ventilation moulding for VL 414 next to gas appliance.

Installation accessories for air ducting you will find at the pages 285 - 291.

Vario downdraft ventilation 400 series VL 414

- Highly efficient, low noise

- ventilation system especially with remote fan unit AR 410 110
- Function for automatic, sensor-controlled power adjustment depending on the build-up of cooking vapours
- Minimal planning and easy installation
- Solid stainless steel knob, also selectable with black robust finishing, for precise control and personalisation
- Precision crafted 3 mm stainless steel
- For surface mounting with a visible _ edge or for flush mounting
- Can be combined perfectly with other Vario appliances of the 400 series

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

Control knob with illuminated ring. 3 electronically controlled power levels and 1 intensive mode. Automatic sensor-controlled performance adjustment of the ventilation system. Automatic sensor controlled or manual run on function. Large-scale metal grease filter with high grease absorption. Removable, dishwasher-safe grease filter unit. Grease filter and activated charcoal filter saturation indicator. Airflow-optimised interior for efficient air circulation. Interval ventilation, 6 min. Enamelled ventilation grille, dishwasher-safe Air exhaust bend included in delivery. Overflow 250 ml capacity.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Consumption data

Consumption data is referred to a configuration with the remote fan unit AR 403 122. Energy efficiency class A+ at a range of energy efficiency classes from A+++ to D. Energy consumption 40.4 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 57 dB / max. 71 dB normal mode.

Planning notes

For each VL one remote fan unit is recommended.

Maximum cooktop(s) width between two VL: 80 cm except with the CX 482. Vario cooktops like Vario electric grill and Vario gas wok should be placed

between 2 VL. In case of Vario electric grill, recirculation is not recommended. If operated next to gas appliances, the ventilation moulding AA414010 is recommended to ensure maximum performance of the cooktop. Appliance can be snapped into the worktop from above. Depending on the type of installation (surface-mounted or flush-mounted). the specific location of the cut-out and the knob positions may vary. If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thin worktops in particular.

must be supported using suitable substructures. Take into account the appliance weight and additional loads.

Additional instructions for flush mounting:

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining.

The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Please read additional planning notes on page 234 – 237.

Connection

Total connected load 10 W. Connecting cable 1.75 m, pluggable. Plan a LAN cable.

CA 051 300 Teppan Yaki plate made of multi ply material For flex induction cooktop. CA 052 300 Griddle plate in cast aluminum Non-stick. For flex induction cooktop. GP 900 001 Stainless steel frying sensor pan Non-stick coating, ø15 cm.

GP 900 002 Stainless steel frying sensor pan Non-stick coating, ø 19 cm.

GP 900 003

Stainless steel frying sensor pan Non-stick coating, ø21 cm.

Vario flex induction cooktop 200 series VI 262

- Can be combined with the cooktops of the Vario 200 series to a harmonic unity
- Control panel for comfortable and secure operation

Cooking zones

2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W). 2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W).

Handling

Control knobs with illuminated ring. Integrated control panel. Electronic power control in 9 output levels

Features

Cooking area marking. Flex function for rectangular cooking areas. Frying sensor function. Pot detection. Booster function for each cooking area.

Safety

Residual heat indication. Operation indicator. Safety shut-off.

Planning notes

Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. Appliance can be snapped into the worktop from above. Appliance weight: approx. 17 kg.

Please read the installation details regarding air ducting on page 202.

Please read additional planning notes on page 144 - 145.

Connection

Total connected load 7.4 kW. Connecting cable 1.5 m without plug.

VI 242 120 Black control panel Width 38 cm

Included in the price 1 glass scraper

Installation accessories

Vario gas cooktop 200 series VG 264

- Can be combined with the cooktops of the Vario 200 series to a harmonic unity
- Control panel for comfortable and secure operation
- Mechanical power level regulation for 9 power levels, with exact setting
- and reproduction of flame size Solid smooth-surface cast pan supports for easy and safe
- positioning of cookware
- Up to 9.8 KW on 4 burners

Cooking zones

2 high output burner (560 W - 3000 W), suitable for pots up to max. ø 22 cm. 2 standard burners (380 W - 1900 W), suitable for pots up to max. ø 20 cm.

Handling

Control knobs with illuminated ring. Integrated control panel. One-handed operation. Electric ignition.

Features

Two-part cast iron pan support with continuous pot surface. Enamelled burner cover.

Safety

Thermoelectric safety pilot. Residual heat indication. Operation indicator.

Planning notes

VG 264 120F Special nozzles for natural gas 20 mbar can be ordered as spare parts.

VG 264 220

Special nozzles for liquid gas 28-30/37 mbar can be ordered as spare parts.

No intermediate shelf required. Appliance can be snapped into the worktop from above. A minimum lateral clearance of at least 150 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. With a total connected load of more than 11 kW local regulations concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed. The minimum distance between the cooktop surface and a cabinet above, out of combustible material, needs to be 65 cm.

The minimum distance to a ventilation above is shown at the planning hints for the individual ventilation product. Appliance weight: approx. 15 kg.

Please read additional planning notes on page 144 – 145.

Connection

Total connected load gas 9.8/9.8 kW. Total connected load electric 10.0/10.0 W. Connecting cable 1.5 m with plug.

Minimum distance from the appliance cut-out to the side wall 150 mm.

Vario downdraft ventilation 200 series VL 200

- Can be combined with the
- cooktops of the Vario 200 series to a harmonic unity
- Highly efficient ventilation system at the cooktop integrated in the worktop Function for automatic,
- sensor-controlled power adjustment depending on the build-up of cooking vapours
- Minimal planning and easy installation
- Low-noise system with the motor AR410110
- Air extraction or air recirculation system

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

Control knobs with illuminated ring. 3 electronically controlled power levels and 1 intensive mode. Automatic sensor-controlled

performance adjustment of the ventilation system.

Automatic sensor controlled or manual run on function.

Large-scale metal grease filter with high grease absorption.

Removable, dishwasher-safe grease filter unit.

Grease filter and activated charcoal filter saturation indicator. Airflow-optimised interior for efficient

air circulation. Interval ventilation, 6 min.

Enamelled ventilation grille, dishwasher-safe.

Air exhaust bend included in delivery. Overflow 250 ml capacity.

Consumption data

Consumption data is referred to a configuration with the remote fan unit AR 403 122.

Energy efficiency class A at a range of energy efficiency classes from A+++ to D.

Energy consumption 48.3 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 56 dB / max. 71 dB normal mode.

Planning notes

Air recirculation mode in combination with remote fan unit with AR 410 110 or AR 413 122

Air extraction in combination with remote fan unit AR 400 142, AR 401 142 or AR 403 122. For each VL one remote fan unit is recommended.

Maximum cooktop width between 2 VL: 80 cm.

Vario cooktops like Vario electric grill and Vario gas wok should be placed between 2 VL.

In case of Vario electric grill recirculation is not recommended.

AD 410 040: Flexibel connecting piece for VL, DN 150 flat

AD 851 041: Connecting piece VL for extension with flat duct DN 150 for extra deep worktop

Please read additional planning notes on page 266 – 269.

If installed next to gas appliances, the

Cooktops

CG 492 111F

Stainless steel Width 100.2 cm Liquid gas 28 – 37 mbar Wok burner with up to 5.8 kW CG 492 211 Stainless steel Width 100.2 cm Natural gas 20 mbar Wok burner with up to 6 kW

Included in the price

1 wok attachment ring

Necessary installation accessories CA 429 410 Frame set including decorative frame

(to be welded in) and holding frame

Special accessories

WP 400 001 Wok pan made of multiple-layer material With round bottom and handle, ø36 cm, 6 litres, height 10 cm.

Gas cooktop 400 series CG 492

- Five multi-ring burners, up to 18kW Full electronic power level
- regulation on 12 levels Precise and reproducible flame size
- Automatic fast ignition, electronic
- flame monitoring with automatic re-ignition Simmer function for cooking on a
- very low output level
- Solid smooth-surface cast iron pan supports on the same level as the worktop
- Solid stainless steel control knob

Cooking zones

CG 492 111F 1 multi-ring wok burner (300 W - 5800 W), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (165 W - 4000 W), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (165 W - 2000 W), suitable for pots up to max. ø 24 cm.

CG 492 211

1 multi-ring wok burner (300 W - 6000 W), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (165 W - 4000 W), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (165 W - 2000 W), suitable for pots up to max. ø 24 cm.

Handling

Control knobs with illuminated ring, cooking zone and output level markings. One-handed operation. Full electronic control in 12 output levels for exact power level regulation plus simmer function. Automatic fast ignition.

Features

Simmer function Three-part cast iron pan support with flat, continuous pot surface, on the same level as the worktop. Brass burner rings.

Safety

Electronic flame monitoring with automatic re-ignition. Residual heat indication. Safety shut-off.

Planning notes

The frame set (necessary installation accessory) can be sent in advance to the manufacturer of the stainless steel or granite worktop for fitting. Special nozzles can be ordered as spare parts. Plan for an electrical connection (the appliance is not operable without power supply). The horizontal positioning of the knobs may be aligned with the specific burners. The drawing "Installation of the control knob" must be observed if the panel is more than 23 mm thick (there must be a recess at the rear). Minimum worktop depth 70 cm. Air intake from above No intermediate shelf required.

Due to the separate frame welded into the worktop, all parts remain fully accessible

Rear panel and wall trims must be heatresistant and consist of a non-flammable material.

The appliance can be fixed from above. A minimum lateral clearance of at least 300 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. With a total connected load of more than 11 kW local regulations

concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed. The minimum distance between the cooktop surface and a cabinet above. out of combustible material, needs to be 76 cm.

The minimum distance to a ventilation above is shown at the planning hints for the individual ventilation product. The combination with VL 414 is not recommended, since the air extraction from the centre burner cannot be guaranteed due to the distance. Appliance weight: approx. 35 kg.

Connection

Total connected load gas 17.8/18.0 kW. Total connected load electric 15.0/15.0W. Connecting cable 1.4 m with plug.

Installation of the control knob; flush installation

measurements in mm

For further installation options, see the installation instructions Measurements in mm

1 wok attachment ring

Special accessories

WP 400 001 Wok pan made of multiple-layer material With round bottom and handle, ø 36 cm, 6 litres, height 10 cm.

Gas cooktop 200 series VG 295

- Control panel for comfortable and secure operation
- Mechanical power level regulation for 9 power levels, with exact setting and reproduction of flame size
- Multi-ring burner of solid,
- heat-resistant brass as used in professional kitchen
- Solid smooth-surface cast iron pan supports
- Up to 17.8 kW on 5 burners

Cooking zones

VG 295 150F 1 multi-ring wok burner (300 W – 5800 W), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (170 W – 4000 W), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (170 W – 2000 W), suitable for pots up to max. ø 24 cm.

VG 295 250

1 multi-ring wok burner (300 W - 6000 W), suitable for pots up to max. ø 32 cm. 2 two-ring high output burners (170 W - 4000 W), suitable for pots up to max. ø 28 cm. 2 two-ring standard burners (170 W - 2000 W), suitable for pots up to max. ø 24 cm.

Handling

Control knobs with illuminated ring. Integrated control panel. One-handed operation. Electric ignition.

Features

Three-part cast iron pan support with flat, continuous pot surface. Brass burner rings.

Safety

Thermoelectric safety pilot. Residual heat indication. Operation indicator.

Planning notes VG 295 150F

Special nozzles for natural gas 20 mbar can be ordered as spare parts.

VG 295 250 Special nozzles for liquid gas 28-30/37 mbar can be ordered as spare parts.

No intermediate shelf required. Appliance can be snapped into the worktop from above. Rear panel and wall trims must be heatresistant and consist of a non-flammable material. Installation in a 90 cm wide lower cabinet is required. A minimum lateral clearance of at least 300 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. With a total connected load of more than 11 kW local regulations concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed.

The minimum distance between the cooktop surface and a cabinet above, out of combustible material, needs to be 76 cm.

The minimum distance to a ventilation above is shown at the planning hints for the individual ventilation product. Appliance weight: approx. 29 kg.

Connection

Total connected load gas 17.8/18.0 kW. Total connected load electric 10 W.

Connecting cable 1.5 m with plug.

Control knobs with cooking zone and output level markings for 9 levels. One-handed operation. Electric ignition.

Features

Three-part cast iron pan support with continuous pot surface. Enamelled burner cover.

Safety

Thermoelectric safety pilot.

Planning notes

The cooktop can only be surface-mounted. Special nozzles can be ordered as spare parts. Installation in a 85 cm niche or a 88 cm

niche with the included spacers. Air intake from above. Intermediate shelf is required. Appliance must be fixed from underneath. A minimum clearance of at least 150 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. With a total connected load of more than 11 kW local regulations concerning room ventilation, room size and combination of extraction or recirculation hoods must be observed. Minimum clearance between gas cooktop(s) with more than 11 kW and ventilation hood 70 cm. Appliance weight: approx. 17 kg.

Connection

Total connected load gas 12.5 kW. Connecting cable 1.0 m without plug.

* 61 mm in the area of the gas connection at the back right

CG 261 210

Stainless steel Width 60 cm Natural gas 20 mbar Nozzles for liquid gas 28-30/37 mbar included

Included in the price

cross support for espresso
 wok attachment ring

Special accessories

WP 400 001 Wok pan made of multiple-layer material With round bottom and handle, ø 36 cm, 6 litres, height 10 cm.

Gas cooktop 200 series CG 261

- Mechanical power level regulation for 9 power levels, with exact setting and reproduction of flame size
- Up to 9.75 kW with burners in a diamond-shaped arrangement

Cooking zones

1 multi-ring wok burner (1550 W – 4000 W).

1 high output burner (500 W - 3000 W),
suitable for pots up to max. ø26 cm.
1 standard burner (290 W - 1750 W),
suitable for pots up to max. ø20 cm.
1 economy burner (330 W - 1000 W),
suitable for pots up to max. ø16 cm.

Handling

Control knobs with cooking zone and output level markings for 9 levels. One-handed operation. Electric ignition.

Features

Two-part cast iron pan support with continuous pot surface. Enamelled burner cover.

Safety

Thermoelectric safety pilot.

Planning notes

The cooktop can only be surface-mounted. Special nozzles can be ordered as spare parts. Installation in a 56 cm standard niche. Air intake from above. Intermediate shelf is recommended. Allow for a gas connection when planning drawer depth. Appliance must be fixed from underneath. A minimum clearance of at least 100 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted. Appliance weight: approx. 12 kg.

Connection

Total connected load gas 9.75 kW. Connecting cable 1.0 m without plug.

* 56 mm in the area of the gas connection at the back right

1 cooking sensor for temperature regulation

Special accessories

CA 051 300

- Teppan Yaki plate made of multi ply material
- For flex induction cooktop.

Cooking sensor for temperature

regulation within pots

GN 232 110 Teppan Yaki plate made of multi ply material,

GN 1/1

For full surface induction cooktops. GN 232 230 Teppan Yaki plate made of multi ply

material, GN 2/3

For full surface induction cooktops.

Full surface induction cooktop 400 series CX 492

- One single big cooking surface
- Free positioning of cookware
- All sizes and formats of cookware can be used
- TFT touch display for an intuitive control of all functions
- Cooking sensor function for temperature control in pots
- Professional cooking functions
- Max. power output for big cookware of up to 5.5 kW
- Frameless for flush mounting

Cooking zones

One unique cooking surface of 3200 cm². Up to 6 items of cookware can be placed simultaneously on the cooktop.

Handling

Easy to use colour graphic TFT touch display with use indications. Electronic power control in 17 output levels.

Features

Cooking sensor function. Professional cooking function. Dynamic cooking function. Teppan Yaki function. Booster function for pots. Booster function for pans. Keep warm function. Individual pot detection. Cooking timer for each cooking position. Stopwatch. Short-term timer. Information key with use indicators. Power management.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable ventilation). Remote monitoring. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Safety

Main switch. Residual heat indication. Child lock. Safety shut-off. Pause function.

Planning notes

Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP400001 cannot be used with this appliance. Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The bearing capacity and stability, in the case of thin worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining.

Appliance must be fixed from underneath. Joint width may vary due to dimensional tolerances of the glass ceramic cooktop and the worktop cut-out. Appliance weight: approx. 31 kg.

Please read the installation details regarding air ducting on page 202.

Please read additional planning notes on page 130 – 134.

Safety

Main switch. Residual heat indication. Child lock. Safety shut-off. Pause function.

Planning notes

Depending on the type of installation (surface-mounted or flush-mounted), the specific definition of the cut-out must be observed. If combining several Vario appliances of the 400 series, select combinations with or without appliance cover, and a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

Please read additional planning notes on page 130 and 132.

If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs. Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400 001 cannot be used with this appliance. Appliance can be snapped into the worktop from above. Appliance weight: approx. 31 kg.

Appliance weight: approx. 31 kg.

Flex induction cooktop with integrated ventilation system 400 series CV 492

- Flex function for combining the rectangular cooking areas
- Free positioning of cookware inside combined cooking areas with auto-
- matic extension up to 30 cm width – Highly efficient ventilation system
- integrated in the cooktop - Fully automatic ventilation system
- functions - Large-scale metal grease filter,
- easy to remove, dishwasher-safe - Energy-saving, low-noise fan
- Air extraction or air recirculation
- system
 Integrated activated charcoal filter easily removeable from above for air
- recirculation system - Solid stainless steel control knob with black coating
- Easy control of all functions with bicoloured display

Cooking zones

2 flex induction cooking areas 23x20 cm (2200 W, with booster 3700 W), linked together 23x40 cm (3300 W, with booster 3700 W), with automatic extension up to 32x30 cm (3300 W, with booster 3700 W). 2 flex induction cooking areas 23x20 cm (2200 W, with booster 3700 W), linked together 23x40 cm (3300 W, with booster 3700 W), with automatic extension up to 32x30 cm (3300 W, with booster 3700 W).

Performance of ventilation system

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Air extraction: 532 / 636 m³/h. 70 / 74 dB (A) re 1 pW. Air recirculation: 487 / 611 m³/h. 67 / 72 dB (A) re 1 pW.

Handling

Control knobs with illuminated ring, cooking zone and output level markings. Electronic power control in 12 output levels. User friendly control with bicoloured display (white / orange). Control of ventilation system with 3 electronically controlled power levels and 1 intensive mode.

Features

Flex function for rectangular cooking areas Frving sensor function. Booster function. Automatic sensor-controlled performance adjustment of the ventilation system. Automatic activation of the ventilation system when a cooking zone is used. Interval ventilation, 6 min. Automatic sensor controlled or manual run on function. Activated charcoal filter saturation indicator. Removable, dishwasher-safe grease filter unit.

High-grade black zinc die-casted cover for ventilation system, dishwasher-safe. Fan technology with highly efficient, brushless DC motor (BLDC). Airflow-optimised interior for efficient air circulation. Stopwatch. Short-term timer. Memory function. Options menu.

Power management.

Selected digital services (Home Connect)

Remote control and monitoring of ventilation. Remote monitoring of cooking zones.

Remote diagnostics.

Please read additional information on Home Connect on page 411.

Consumption data

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 56.9 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 61 dB / max. 70 dB normal mode.

Safety

Operation indicator. Pot detection. 2-stage residual heat indication. Safety shut-off. Detachable, dishwasher-safe two-stage overflow protection. Removable overflow container, 0,9-litre capacity, dishwasher-safe.

Planning notes

Bottom cabinet width: min. 60 cm. Worktop depth: min. 60 cm. The unducted recirculation set CA082011 requires a vertical aperture of min. 25 mm behind the backpanel of the furniture. Suggested for ideal performance are 50 mm. The air outlet on the backside of the appliance can directly be accessed with a flat duct element (DN 150). In air extraction mode a one-way flap with a maximum opening pressure of 65 Pa should be installed. For optimum performance in air recirculation we recommend an outflow surface area of at least 440 cm² Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The pressuredrop resistant blower allows for ductings up to 8 m with $3 \times 90^{\circ}$ bows while keeping sufficient performance. Appliance must be fixed from underneath. Appliance weight: approx. 30 kg. The appliance must be freely accessible from below. When installing a ventilation hood with air extraction mode and a chimney-vented

fireplace, the power supply line of the

ventilation appliance needs a suitable

safety switch.

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The bearing capacity and stability, in the case of thin worktops in particular. must be supported using suitable substructures. Take into account the appliance weight and additional loads. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. Joint width may vary due to dimensional tolerances of the glass ceramic cooktop and the worktop cut-out.

Please read additional planning notes on page 180 – 181.

Teppan Yaki plate made of multi ply material For flex induction cooktop. CA 052 300 Griddle plate in cast aluminium

Non-stick. For flex induction cooktop.

CA 060 300

Cooking sensor for temperature regulation within pots

CA 230 1000 Black magnetic knob for induction cooktop 200 series Stainless steel knob with black

coating.

CA 282 112

4 activated charcoal filters with highly efficient odour reduction and allergen deactivation.

GP 900 001

Stainless steel frying sensor pan Non-stick coating, ø 15 cm. GP 900 002 Stainless steel frying sensor pan Non-stick coating, ø 19 cm. GP 900 003 Stainless steel frying sensor pan

Non-stick coating, ø 21 cm.

Installation accessories for air ducting you will find at the pages 285 – 291.

Flex induction cooktop with integrated ventilation system 200 series CV 282

- Sturdy stainless steel frame
- Flex function for combining the rectangular cooking areas
- Free positioning of cookware inside combined cooking areas
- Highly efficient ventilation system integrated in the cooktop
- Fully automatic ventilation system functions
- Large-scale metal grease filter, easy to remove, dishwasher-safe
- Energy-saving, low-noise fan
- Air extraction or air recirculation system
- Integrated activated charcoal filter easily removeable from above for air recirculation system
- Twist-Pad control with removable magnetic knob
- Easy control of all functions with bicoloured display

Cooking zones

2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W). 2 flex induction cooking areas 23x19 cm (2200 W, with booster 3700 W), linked together 23x38 cm (3300 W, with booster 3700 W).

Performance of ventilation system

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Odour reduction for air recirculation in accordance with EN 61591. Air extraction: 532 / 636 m³/h. 70 / 74 dB (A) re 1 pW. Air recirculation: 487 / 611 m³/h. 67 / 72 dB (A) re 1 pW.

Handling

Twist-Pad control with removable magnetic knob. User friendly control with bicoloured display (white / orange). Cooking zone and cooking area marking. Electronic power control in 17 output levels. Control of ventilation system with 3 electronically controlled power levels and 1 intensive mode.

Features

Flex function for rectangular cooking areas. Automatic pot detection when the cooktop is switched on. Professional cooking function. Cooking sensor function (in use with cooking sensor CA 060 300).** Frying sensor function. Booster function for pots. Booster function for pans. Keep warm function. Automatic sensor-controlled performance adjustment of the ventilation system. Automatic activation of the ventilation system when a cooking zone is used. Interval ventilation, 6 min. Automatic sensor controlled or manual run on function.

Activated charcoal filter saturation indicator Removable, dishwasher-safe grease filter unit. High-grade black zinc die-casted cover for ventilation system, dishwasher-safe. Fan technology with highly efficient, brushless DC motor (BLDC). Airflow-optimised interior for efficient air circulation. Stopwatch. Cooking timer for up to 99 minutes. Short-term timer. Memory function. Options menu. Power management.

Selected digital services

(Home Connect) Remote control and monitoring of ventilation. Remote monitoring of cooking zones. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Consumption data

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 56.9 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 61 dB / max. 70 dB normal mode.

Safety

Main switch. Operation indicator. Pot detection. 2-stage residual heat indication. Child lock. Safety shut-off. Detachable, dishwasher-safe two-stage overflow protection. Removable overflow container, 0,9-litre capacity, dishwasher-safe.

Planning notes

Bottom cabinet width: min_60 cm Worktop depth: min. 60 cm. Immersion depth 223 mm. The unducted recirculation set CA082011 requires a vertical aperture of min. 25 mm behind the backpanel of the furniture. Suggested for ideal performance are 50 mm. The air outlet on the backside of the appliance can directly be accessed with a flat duct element (DN 150). In air extraction mode a one-way flap with a maximum opening pressure of 65 Pa should be installed. For optimum performance in air recirculation we recommend an outflow surface area of at least 440 cm². Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The pressuredrop resistant blower allows for ductings up to 8 m with $3 \times 90^{\circ}$ bows while keeping sufficient performance. Appliance must be fixed from underneath. Appliance weight: approx. 29 kg. The appliance must be freely accessible from below.

When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

The bearing capacity and stability, in the case of thin worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads.

Please read additional planning notes on page 180 - 181.

Connection

measurements in mm

EB 333

Good to know - for correct planning and installation

- For depth measurements, take account of the depth of the furniture cavity and worktop overhangs of the kitchen furniture.
- The air extraction ducting can be connected to the rear. The respective connecting pieces are available for this purpose.
- The appliance must be accessible from underneath.

Air recirculation

- Installation with air recirculation kits
- Filters can be replaced from above.
- Allow accessibility from below.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 440 cm²)

- The unducted recirculation set CA 082 011 requires a vertical aperture of min. 25 mm behind the backpanel of the furniture. Suggested for ideal performance are 50 mm

Planning example 1 CV 282 / CV 492 with unducted air recirculation

Wall installation, worktop depth 60 cm, Vertical aperture of min. 25 mm behind the backpanel of the furniture. Suggested for ideal performance are 50 mm. Not recommended for non-thermally insulated outer wall or floor (U \ge 0.5 W/m²°C).

Planning example 2

CV 282 / CV 492 with unducted air recirculation

Island installation, worktop depth 120 cm, Vertical aperture of min. 25 mm behind the back panel of the furniture. Suggested for ideal performance are 50 mm. Not recommended for non-thermally insulated outer wall or floor (U ≥ 0.5 W/m²°C).

List of components:

- 1 x CA 082 011 Recirculation kit

Planning example 3

CV 282 / CV 492 with ducted recirculation

Island installation, worktop depth 90 cm

Not recommended for non-thermally insulated outer wall or floor (U ≥ 0.5 W/m²°C)

List of components:

- 1 x CA 082 071 Kit ducted air recirculation, 70 cm worktop depth

Air extraction

- Appliance is directly accessible with male flat duct DN 150.
- For all extraction installations please foresee acoustic filter (CA 084 010)
- Maximum length of the air extraction ducting system 8 m to assure good performance.
- For optimum air circulation, we recommend ducts with DN 150. Ducting and connection pieces are available as special accessories.
- Two flat ducts must be connected with a flat duct connecting piece.

Planning example 4

CV 282 / CV 492 with air extraction installation

Wall installation, worktop depth 60 cm, direct connection to flat wall outlet.

Planning example 5

CV 282 / CV 492 with air extraction installation

List of components:

- 1 x CA 084 010 Extraction kit

- 1 x AD 857 010 Flat duct DN 150 (1 meter)
- 1 x AD 857 030
- Flat duct bend 90° vertical DN150 flat
- 1 x AD 857 041 Flat duct adapter round DN150 to DN150 flat
- 3 x AD 752 010 Round duct DN150
- 1 x AD 752 030 Duct bend 90 $^\circ$ DN150
- 1 x AD 754 090 Pipe connector DN150
- 1 x AD 750 053
- Wall outlet with telescopic duct DN150
- 1 x AD 990 090 Adhesive tape
- 2 x AD 857 040 Flat duct connecting piece

Planning example 6 CV 282 / CV 492 with air extraction installation

Wall installation, worktop depth 65 cm, ducting behind the cabinet and in the plinth

List of components:

- 1 x CA 084 010 Extraction kit
- 4 x AD 857 010 Flat duct DN 150 (1 meter)
- 1 x AD 857 030
- Flat duct bend 90° vertical DN150 flat - 1 x AD 857 031 Flat duct ben 90° horizontal
- 1 x AD 850 050 Wall outlet DN150 flat
- 1 x AD 857 033
- Short flat duct bend 90 $^\circ$ vertical DN150 $^\circ$ - 6 x AD 857 040 Flat duct connecting piece

- rectangular cooking areas
- Free positioning of cookware inside combined cooking areas
- Professional cooking function for splitting the cooktop into
- predefined heat areas Cooking sensor function for temperature control in pots
- Frying sensor function for
- temperature control in pans - Large cooking zone for pots up to
- ø 32 cm – Twist-Pad control with removable magnetic knob
- Easy control of all functions with bicoloured display

Cooking zones

2 flex induction cooking areas 23x20 cm (2200 W, with booster 3700 W), linked together 23x40 cm (3300 W, with booster 3700 W). 2 flex induction cooking areas 23x20 cm (2200 W, with booster 3700 W), linked together 23x40 cm (3300 W, with booster 3700 W). 1 induction cooking zone ø 21 cm (2200 W, with booster 3700 W), automatically switches to ø 26 cm (2600 W, with booster 3700 W) and to ø 32 cm (3300 W, with booster 3700 W).

Handling

Twist-Pad control with removable magnetic knob. User friendly control with bicoloured display (white / orange). Cooking zone and cooking area marking. Electronic power control in 17 output levels.

Features Flex function for rectangular cooking areas. Professional cooking function. Cooking sensor function (in use with cooking sensor CA 060 300).* Frying sensor function. Booster function for pots. Booster function for pots. Booster function for pans. Keep warm function. Stopwatch. Cooking timer for up to 99 minutes. Short-term timer. Options menu.

Power management. Cooktop-based ventilation control (with suitable hood).

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable ventilation). Remote monitoring. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Safety

Main switch. Operation indicator. Pot detection. 2-stage residual heat indication. Child lock. Safety shut-off.

Planning notes

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining. The joint width may vary due to size tolerances of the combinations and of the worktop cut-out. Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400 001 cannot be used with this appliance. Appliance must be fixed from underneath. Appliance weight: approx. 27 kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 11.1 kW. Connecting cable 1.5 m without plug. Power consumption standby/ display off 0.5 W. Power consumption standby/ network 2.0 W. Please check the user manual for how to switch off the WiFi module.

A: 6.5^{+0.5}
B: Please check the installation manual in case the worktop depth is below 600 mm.

- Easy control of all functions with bicoloured display

Cooking zones

2 flex induction cooking areas 22,5x19 cm (2200 W, with booster 3700 W), linked together 22,5x38 cm (3300 W, with booster 3700 W), with automatic extension up to 30x30 cm (3300 W, with booster 3700 W). 2 flex induction cooking areas 22,5x19 cm (2200 W, with booster 3700 W), linked together 22,5x38 cm (3300 W, with booster 3700 W), with automatic extension up to 30x30 cm (3300 W, with booster 3700 W).

Handling

Twist-Pad control with removable magnetic knob. User friendly control with bicoloured display (white / orange). Cooking zone and cooking area marking. Electronic power control in 17 output levels.

Features

Flex function for rectangular cooking areas. Professional cooking function. Cooking sensor function (in use with cooking sensor CA 060 300).* Frving sensor function. Booster function for pots. Booster function for pans. Keep warm function. Stopwatch. Cooking timer for up to 99 minutes. Short-term timer. Options menu. Power management. Cooktop-based ventilation control (with suitable hood).

Selected digital services (Home Connect)

Cooktop-based ventilation control (with suitable ventilation). Remote monitoring. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Safety

Main switch. Operation indicator. Pot detection. 2-stage residual heat indication. Child lock. Safety shut-off.

Planning notes

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. Operates with magnetic (induction) iron pots and pans only. For an optimal heat distribution, the use of sandwich bottom cookware is recommended. The wok pan WP 400001 cannot be used with this appliance. Appliance must be fixed from underneath. Appliance weight: approx. 17 kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 7.4 kW. Connecting cable 1.5 m without plug. Power consumption standby/ display off 0.5 W. Power consumption standby/ network 2.0 W. Please check the user manual for how to switch off the WiFi module.

A: Please check the installation manual in case the worktop depth is below 600 mm.

Installation notes for induction cooktops and glass ceramic

Applies to CI 26./27./28./29., CX 492/482, VI 414/422/462/482/492, VI 232/242/262 and CE 261/291.

Intake air ducting

Induction cooktops have a cooling fan to protect the appliance's electronics from overheating. In the case of insufficient air circulation in the cabinet, the appliance's output will be reduced to prevent electronic damage.

A Air duct behind a cabinet or built-in oven appliance's output will be reduced to prevent electronic damage.

20 mm is needed across the full width and full height of the cabinet. Cabinets with a closed bottom also need a respective cross-section in the air duct area.

B Intake through the cabinet's back wall

In the cabinet's back wall, plan a recess of at least 45 mm in height from the worktop's bottom edge.

The minimum width is

- 300 mm for a 30 cm induction cooktop
- 350 mm for a 40 cm induction cooktop
- 550 mm for a Vario cooktop or a 60 cm to 80 cm induction cooktop
- 820 mm for a 90 cm induction cooktop

To prevent the content of drawers underneath the cooktop from heating up, the use of an intermediate shelf is required for glass ceramic cooktops. Width of cut-out at least

- 100 mm for a 60 to 80 cm induction cooktop
- * does not apply to 90 cm cooktops ** min. 65 mm for cooktops

with frame as well as VI 462/482/492 for surface mounting and min. 70 mm for cooktops without frame, for CX 482/492 with frame as well as for VI 462/482/492 for flush mounting. For CX 482/492 without frame 80 mm

Installation above dishwasher or washing machine is not permitted.

In addition to the measures mentioned above, the following unobstructed cross sections must be planned between the cabinet and the AL 400 to allow for proper intake and exhaust air circulation for the induction cooktop.

20 mm distance between the back side of drawers, an oven or the cabinet's

The resulting gap between the air duct and the cabinet's side wall needs to

interior wall.

remain open.

Combination with other appliances

Combination with AL 400

Intermediate shelf

A In front of the air duct

B Adjacent to the air duct

C At the housing's rear edge

The resulting cross section between the housing and the wall, as well as between the housing and the floor, must remain open.

EB 333

CE 291 101 Frameless Width 90 cm

Included in the price 1 glass scraper

Special accessories

GP 900 003 Stainless steel frying sensor pan Non-stick coating, ø21 cm.

Glass ceramic cooktop 200 series CE 291

- Frameless for flush mounting _
- -Frying sensor function
- Three-ring cooking zone up to 27 cm Large roasting zone
- _
- Sensor control with direct selection of output level

Cooking zones

2 Super-Quick cooking zones ø 18 cm (1800 W); together they convert to 18x41.5 cm (4400 W) roasting zone. 1 Super-Quick cooking zone ø12 cm (750 W), converts to ø 21 cm (2100 W, with booster 2600 W) cooking zone. 1 Super-Quick cooking zone ø14.5 cm (1050 W), converts to ø21 cm (2200 W) or ø 27 cm (3080 W) cooking zone. 1 Super-Quick cooking zone ø14.5 cm (1200 W, with booster 1600 W).

Handling

Sensor control with direct selection of ouput level. Cooking zone marking. Electronic power control in 17 output levels.

Features

Frying sensor function for $ø 21 \, \text{cm}$ cooking zone. Booster function. Cooking timer for up to 99 minutes. Short-term timer. Options menu.

Safety

Main switch. Operation indicator. 2-stage residual heat indication. Child lock. Safety shut-off.

Planning notes

Immersion depth 51 mm, depth at plug socket 51 mm.

The cooktop must not be installed lower than the top edge of the worktop. Under the plug socket, a 10 mm clearance must be observed from side panels or from intermediate shelf. The cooktop must be freely accessible from underneath to be able to detach the cooktop's base in a downward direction.

Installation possible in a 60 cm wide lower cabinet.

Appliance must be fixed from underneath. Cooktop clamping range: 20 - 50 mm. Joint width may vary due to dimensional tolerances of the glass ceramic cooktop and the worktop cut-out. Appliance weight: approx. 13 kg.

Please read the installation details regarding air ducting on page 202.

Connection

Total connected load 11.0 kW. Plan a connection cable.

A: Minimum distance from the hob cut-out to the wall.

Regenerable in the oven at 200°C. For air recirculation module AA 200 812/816 and AA 010 811/ AA 012 811.

Installation accessories for air ducting you will find at the pages 285 – 291.

Vario ceiling ventilation 400 series AC 402

- Discreet integration into the architecture of the kitchen
- Flexible by dimension, performance and ventilation mode
- Room ventilation
- Modular ceiling ventilation which can be configurated individually by separate components such as filter module, control modules and light module
- Motorless, can be combined with Gaggenau BLDC remote fan units
 Highly efficient patented rim
- extraction
- Planed and easy to clean underside with covered filters

Output

Noise level depends on the built-in situation.

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

Rim extraction filter, dishwasher-safe. Installation frame for thread rods (threaded rods included in delivery). Connecting pipe DN 150 round.

Consumption data

Consumption data is referred to a configuration with the remote fan unit AR 400 142. Energy efficiency class B at a range of energy efficiency classes from A+++ to D. Energy consumption 60.6 kWh/year. Ventilation efficiency class A. Ilumination efficiency class B. Grease filter efficiency class B. Sound level min. 50 dB / max. 65 dB normal mode.

Planning notes

The ceiling ventilation has to be handled as a room ventilation when distance to cooktop is larger than 120 cm since the direct capture of vapours will be limited. The needed airflow is given by an air exchange rate of 10 to 12 times the room volume. For air recirculation an external air recirculation module is required. Max. 3 filter modules to be connected to remote fan unit AR 400 142. When installing remote fan unit within the ceiling or furniture block it must remain accessible through the ceiling cutout or another maintenance access. Please ensure when installing the exhaust air ducting that no sharp bends are caused and that the cross-section of the ducting is not constricted in any way. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the hood's power supply line needs a suitable safety switch.

Please read additional planning notes on page 222 – 223.

AC 482 181

Stainless steel Control module with light

Individual integration of light elements into the configuration of the ceiling ventilation

Vario ceiling ventilation 400 series

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction.

Features

7-key infrared remote control, backup keys for operation also on the control module.

3 electronically controlled power levels

and 1 intensive mode. Interval ventilation, 6 min.

Run-on function, 6 min.

Grease filter saturation indicator.

Planning notes

Connection to the respective appliances via network cable. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch. Fixing at the filter module.

Please read additional planning notes on page 222 – 223.

Connection

Total connected load 355 – 1160 W. Connecting cable 1.75 m, pluggable.

EB 333

AC 472 181

Stainless steel

For completing control module with

Light module

light

Vario ceiling ventilation 400 series AC 472

- Light module of ceiling ventilation
 Individual integration of light elements into the configuration of
- the ceiling ventilation

Features

Connection to the respective appliances via network cable.

Planning notes

Fixing at the filter module.

Please read additional planning notes on page 222 – 223.

Connection

Total connected load 50 W. Connecting cable 1.75 m, pluggable. Network cable 2 m.

For multiple configurations: Ceiling deflection around cutout: max. + 3 mm. Support is required in the middle to prevent deflection upwards when fastening the modules. The required threaded rods, nuts and ceiling bolts are supplied as standard.

AL 400 122 stainless steel

Width 120 cm Air extraction / Air recirculation

AL 400 192

stainless steel Width 90 cm Air extraction / Air recirculation Motorless

Necessary installation accessories Depending on the connection option (front, back, or bottom) one of the following accessories must be ordered.

AD 754 049 Connecting piece for AL 400 (front or back side) Metal zinc coated

DN 150 round

AD 854 050 Connecting piece for AL 400 (bottom side) Metal zinc coated DN 150 flat

Installation accessories

AA 409 401 Furniture support for table ventilation AL 400 90 cm AA 409 431 Furniture support for table ventilation AL 400 120 cm AD 704 050 Air collector box for AL 400 Metal zinc coated DN 150 flat

Special accessories

Window contact switch

Installation accessories for air ducting you will find at the pages 285 – 291.

Table ventilation 400 series AL 400

- Extendable table ventilation, when not in use can be completely lowered into the worktop
- Can be combined perfectly with all Vario cooktops 400 series
- Dimmable, neutral white surface LED light for ideal illumination of
- the cooktop Precision crafted 3 mm stainless steel
- For surface mounting with a visible edge or for flush mounting
- Motorless, can be combined with Gaggenau BLDC remote fan units

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

3 electronically controlled power levels and 1 intensive mode. Interval ventilation, 6 min. Run-on function, 6 min. Grease filter saturation indicator. 2 large-scale metal grease filters included, easy to remove and dishwasher-safe Grease drip trays, easy to remove and dishwasher-safe. Neutral white surface LED light (3600 K), continuously dimmable. Lamp output 2 x 10 W. Illuminance 400 lx. Flexible connection options to the remote fan unit: at the bottom, at the front or at the back. In all the options, it is possible to have space for drawers in front of the table ventilation.

Consumption data

AL 400 192 : Consumption data is referred to a configuration with the remote fan unit AR 400 142. Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 45.5 kWh/year. Ventilation efficiency class A. Ilumination efficiency class C. Grease filter efficiency class B. Sound level min. 45 dB / max. 61 dB normal mode.

AL 400 122 : Recommended only in recirculation mode for EU countries, the consumption data is not mandatory in this mode.

Planning notes

AL 400 192 : Combinable with all cooktops Vario 400 series, 400 series and 200 series. Maximum cooktops width: 90 cm.

AL 400 122 : Combinable with all cooktops Vario 400 series and 400 series. Maximum cooktops width: 120 cm. It is recommended to use two remote fan units so that sufficient vapour captation will be ensured. For EU countries due to legislation EU 66/2014 only air recirculation is recommended. Depending on the type of installation, the corresponding accessories must be ordered separately.

Air recirculation is not recommended in combination with Vario electric grill. Operation of Vario cooking appliances only possible without appliance cover.

Max. output of cooktops 18 kW. The table ventilation must have its own worktop cut-out.

The bearing capacity and stability, in the case of thin worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads. The remaining surface of the worktop (min. 50 mm) between the cut-outs must be reinforced with a support. It is recommended to use furniture support AA 409 401/431.

Additional instructions for flush mounting: Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. Depending on the type of installation, ovens can be combined with the table ventilation.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

The control unit should be accessible and be secured to a panel of the cabinet that avoids any risk of flooding.

Please read additional planning notes on page 226 – 231.

Connection

Total connected load 65 W Connecting cable 1.7 m with plug. Network cable 1.2 m.

Measurements in mm

Measurements in mm

View from above

Measurements in mm

Good to know - for correct planning and installation

- For depth measurements, take account of the depth of the furniture cavity and worktop overhangs of the kitchen furniture.
- The ducting can essentially be connected to the front, the back or straight down. The respective connecting pieces are available for this purpose.
- It is also important that ducting is well sealed in order to prevent air leaks, e.g. by using the adequate adhesive tape or using the adequate connecting piece.
- Plastic ducts can be used for installation behind a gas appliance. The maximum permitted performance of the cooktops is 18 kW.
- For the AL 400 122 it is recommended to use two remote fan units, with this we can ensure a sufficient vapour captation. For EU countries, the AL 400 122 is only recommended in air recirculation due to legislation EU 66/2014.
- Vario cooktops with intensive vapour formation like Vario Teppan Yaki or Vario electric grill should be placed central in front of the ventilation appliance.
- In case of Vario electric grill air recirculation is not recommended.
- The control unit should be accessible and be secured to a panel of the cabinet that avoids any risk of flooding.
- Depending on the type of installation, the corresponding accessories must be ordered separately.

EB 333

Planning example

AL 400 192 with AR 413 122 (air recirculation) remote fan unit

Good to know

- The air collector box can be screwed directly on the remote fan unit.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 400 cm²).

List of components

- 1 x AL 400 192
- 1 x AR 413 122 (remote fan unit air recirculation)
- 1 x AD 854 050 (connecting piece to the bottom)
- 2 x AD 858 010 (flat duct flex pipe)
- 1 x AD 704 050 (air collector flat duct)

Order as set (appliances and accessories): SET1AL4105

A: Surface mounting B: Flush mounting C: 750 mm with a worktop at min. height 920 mm

Measurements in mm

Planning example AL 400 192 with AR 413 122 (air recirculation) or AR 403 122 (air extraction) remote fan unit

Good to know

- The remote fan unit can be connected to the front or the back
- The air collector box can be screwed directly on the remote fan unit.
- Recirculation: For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 400 cm²).
- Extraction : in the example exhaust is towards to the left, it is also possible to the right, please be aware that the measures will be different. - Please note, this installation is also possible with Gaggenau metal ducts.

List of components

- 1 x AL 400 192
- 1 x AR 413 122 (for recirculation) or 1 x AR 403 122 (for extraction)
- 1 x AD 754 049 (connecting piece round duct to front/back)
- 2 x AD 857 042 (flat duct adapter round 90°)
- 1 x AD 858 010 (flat duct flex pipe)
- 1 x AD 704 050 (air collector flat duct)
- 1 x AD 990 091 (adhesive tape aluminium)

Order as set for recirculation mode (appliances and accessories): SET1AL4107

A: Surface mounting B: Flush mounting Extraction mode 1: AR 403 122 2: AR 413 122 vith remote fan unit Measurements in mm

Planning example AL 400 120 cm with AR 410 110 (air recirculation)

Good to know

- The remote fan units can be connected to the front or the back.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 800 cm² 400 cm² for each remote fan unit).
- Please note, this installation is also possible with Gaggenau metal ducts.

List of components

- 1 x AL 400 122
- 2 x AR 410 110 (remote fan unit)
- 1 x AD 754 049 (connecting piece round duct to front/back)
- 2 x AD 857 042 (flat duct adapter round 90°)
- 2 x AD 858 010 (flat duct flex pipe)
- 1 x AD 990 091 (adhesive tape)

-Order as set (appliances and accessories): SET2AL4301

List of components

Planning example

- 1 x AL 400 122
- 2 x AR 413 122 (remote fan unit)
- 1 x AD 754 049 (connecting piece round duct to front/back)

EB 333

Planning example AL 400 120cm with AR 400 142 (air extraction) -Cellar installation - Metal

Good to know

- These installations in extraction with 2 remote fan units are not recommended for EU countries due to legislation EU 66/2014.
- Depending on the distance between the AL400 and the remote fan units you may need more flat and round ducts.

List of components

- 1 x AL 400 122
- 1 x AR 400 142 (remote fan unit)
- 1 x AD 854 050 (connecting piece to the bottom)
- 2 x AD 854 010 (flat duct, metal)
- 2 x AD 854 041 (flat duct adapter round, metal)
- 2 x or more AD 751 010 (aluflex pipe round)
- 1 x AD 990 091 (adhesive tape)

Planning example AL 400 120cm with AR 401 142 (air extraction) -Cellar installation with outside wall remote fan unit - Metal

List of components

- 1 x AL 400 122
- 1 x AR 401 142 (remote fan unit)
- 1 x AD 854 050 (connecting piece to the bottom)
- 2 x AD 854 010 (flat duct, metal)
- 2 x AD 854 041 (flat duct adapter round, metal)
- 2 x or more AD 751 010 (aluflex pipe round)
- 2 x AD 854 032 (flat duct adapter round 90°, metal)
- 2 x or more AD 854 010 (flat duct, metal)
- 2 x AD 854 041 (flat duct adapter round, metal)
- 1 x AD 751 010 (aluflex pipe round) - 2 x AD 704 040 (pipe adapter DN200/150 round, metal)
- 2 x AD 702 052 (telescopic wall duct)
- 1 x AD 990 091 (adhesive tape)

Ventilation moulding for VL 414 next to gas appliance.

Installation accessories for air ducting you will find at the pages 285 - 291.

Vario downdraft ventilation 400 series VL 414

- Highly efficient, low noise

- ventilation system especially with remote fan unit AR 410 110
- Function for automatic, sensor-controlled power adjustment depending on the build-up of cooking vapours
- Minimal planning and easy installation
- Solid stainless steel knob, also selectable with black robust finishing, for precise control and personalisation
- Precision crafted 3 mm stainless steel
- For surface mounting with a visible _ edge or for flush mounting
- Can be combined perfectly with other Vario appliances of the 400 series

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

Control knob with illuminated ring. 3 electronically controlled power levels and 1 intensive mode. Automatic sensor-controlled performance adjustment of the ventilation system. Automatic sensor controlled or manual run on function. Large-scale metal grease filter with high grease absorption. Removable, dishwasher-safe grease filter unit. Grease filter and activated charcoal filter saturation indicator. Airflow-optimised interior for efficient air circulation. Interval ventilation, 6 min. Enamelled ventilation grille, dishwasher-safe Air exhaust bend included in delivery. Overflow 250 ml capacity.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Consumption data

Consumption data is referred to a configuration with the remote fan unit AR 403 122. Energy efficiency class A+ at a range of energy efficiency classes from A+++ to D. Energy consumption 40.4 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 57 dB / max. 71 dB normal mode.

Planning notes

For each VL one remote fan unit is recommended.

Maximum cooktop(s) width between two VL: 80 cm except with the CX 482. Vario cooktops like Vario electric grill and Vario gas wok should be placed

between 2 VL. In case of Vario electric grill, recirculation is not recommended. If operated next to gas appliances, the ventilation moulding AA414010 is recommended to ensure maximum performance of the cooktop. Appliance can be snapped into the worktop from above. Depending on the type of installation (surface-mounted or flush-mounted). the specific location of the cut-out and the knob positions may vary. If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thin worktops in particular.

must be supported using suitable substructures. Take into account the appliance weight and additional loads.

Additional instructions for flush mounting:

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining.

The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Please read additional planning notes on page 234 – 237.

Connection

Total connected load 10 W. Connecting cable 1.75 m, pluggable. Plan a LAN cable.

Good to know - for correct planning and installation

- For depth measurements, take account of the depth of the furniture cavity and worktop overhangs of the kitchen furniture.

- It is also important that ducting is well sealed in order to prevent air leaks, e.g. by using the adequate adhesive tape or using the adequate connecting piece.
- Vario cooktops like Vario electric grill or Vario gas wok should be placed between 2 VL.
- In case of Vario electric grill air recirculation is not recommended.

- With the Vario downdraft ventilation, the ducting can be connected straight down (1) or to the rear using additional connecting pieces (2) and (3). These are available as special accessories, see below.

For the total overall dimensions in the furniture, please also take into account the individual dimensions and position of the ducts and the remote fan unit. The remote fan unit can be turned in all directions, depending on the desired direction for the exhaust air or filter removal.

- Direct installation
 Installation with extension for extra deep worktop and plastic ducting:

 AD 851 041 (Connecting piece for extension)
 AD 857 040 (Flat duct connecting piece, plastic)
 AD 857 030 (Flat duct bend 90° vertical, plastic)

 Installation with extension for extra deep worktop and metal ducting:

 AD 851 041 (Connecting piece for extension)
 AD 851 041 (Connecting piece for extension)
 AD 851 041 (Connecting piece for extension)
 AD 854 000 (Flat duct connecting piece, metal)
 AD 854 030 (Flat duct bend 90° vertical, metal)

A: ≥ 50mm

B: Connecting piece

EB 333

Planning example (air recirculation) - Direct installation VL414 with AR 410 110 remote fan unit

Good to know

- Wall installation, worktop depth 65 cm

- Allow accessibility to the charcoal filters in the lower cabinet for their replacement. Additionally, if the plinth is higher than 80 mm, the external remote fan unit has to be elevated to enable access to the filters. If the plinth is 80 mm high, the remote fan unit can be placed directly on the floor.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 400 cm²).

List of components

- 1 x VL 414 115 Vario downdraft ventilation
- 1 x CKV 410 010 Stainless steel knob or 1 x CKV 410 000 Black knob
- 1 x AR 410 110 (remote fan unit air recirculation)

Installation accessories for air ducting you will find at the pages 285 – 291.

Wall-mounted hood 400 series AW 442

- Professional technology hood combined with classic Gaggenau design
- Highly efficient extraction of cooking vapours due to large vapour collection area
- Motorless, can be combined with Gaggenau BLDC remote fan units
- Angled baffle filter with high grease absorption
- Function for automatic, sensor-controlled power adjustment depending on the build-up of cooking vapours
- Dimmable, neutral white surface LED light for ideal illumination of the cooktop
- Air extraction or air recirculation system
- Air recirculation module with activated charcoal filter: quiet and highly efficient air recirculation solution with odor reduction as in air extraction mode and long replacement intervals

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

2 control panels 3 electronically controlled power levels and 1 intensive mode. Automatic function with sensorcontrolled run-on function. Grease filter saturation indicator. Baffle filter, dishwasher-safe. Neutral white surface LED light (3500 K), continuously dimmable. Lamp output 4x10 W. Illuminance 1010 lx. Easy mounting system for simple installation and alignment.

Consumption data

Consumption data is referred to a configuration AW 442 120 with the remote fan unit AR 400 143. Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 48.1 kWh/year. Ventilation efficiency class A. Ilumination efficiency class B. Grease filter efficiency class B Sound level min. 47 dB / max. 64 dB normal mode.

Planning notes

The two-part chimney must be ordered as an installation accessory. Connection to the respective appliances via network cable. Two chimney lengths are available depending on the height of the room. The AR 400 143 remote fan unit is ideal for space-saving installation for assembly in the AW 442. Clearance above gas appliances min. 70 cm.

Clearance above electric appliances min. 60 cm.

Connection

Total connected load 40 W Connecting cable 1.8 m, pluggable.

- * With air recirculation chimney AD 442 112, suitable for ceiling heights
- With air recirculation chimney AD 442 122, suitable for ceiling heights from 2.60 m to 3.10 m; Specifications refer to the distance of 1.60 m from the floor to the lower edge of the hood.

- With air extraction chimney 442 012, suitable for ceiling heights from 2.35 m to 2.60 m.
 ** With air extraction chimney AD 442 022, suitable for ceiling heights from 2.60 m to 3.10 m; Specifications refer to the distance of 1.60 m from the floor to the lower edge of the hood.

Air exhaust grille air recirculation Stainless steel-coloured, 90 cm, including installation fittings, height adjustable.

Special accessories

AA 413 111 2 activated charcoal filter with highly efficient odour reduction. For air recirculation.

Installation accessories for air ducting you will find at the pages 285 – 291.

Remote fan unit AR 413

- Powerful remote fan unit to
- combine with motorless appliances - Efficient BLDC technology
- Compact and space-saving installation in a 10 cm high plinth

Output

Air output according to EN 61591. max. 900 m³/h.

Sound power and sound pressure depending on built-in situation. Power levels depend on the motorless appliances.

Features

3 electronically controlled power levels and 1 intensive mode. Fan technology with highly efficient, brushless DC motor (BLDC). Steel housing, zinc-plated.

Pipe connection pieces on intake side: 1 x DN 150 round.

Retaining bracket for installation on the ceiling or side of a cupboard enclosed. 2 activated charcoal filters enclosed ex factory.

Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). Filter replacement interval: 1 year depending on cooking frequency.

Planning notes

Remote fan unit in combination with motorless appliances.

Connection to the respective appliances via network cable. Installation in the plinth with cut-out for the air ducting in the furniture base. Filter replacement interval: 1-1.5 years depending on cooking frequency. It must be possible to remove the plinth to replace the filter.

Recommended minimum gap between filter openings and cupboard wall if there is no ventilation grille directly in front: 15 cm.

For optimum performance in air recirculation we recommend an outflow surface area of at least 400 cm².

Connection

Total connected load 180 W. Connecting cable 1.8 m, pluggable. Network cable 2 m.

The external remote fan units have a network cable that is used to connect the motorless appliances of the 400 series and the motorless Vario downdraft ventilation 200 series.

Up to two remote fan units can be connected (e.g. with Vario ceiling ventilation 400 series), whereby an additional network cable is connected from one remote fan unit to the other remotefan unit.

Other control options

The external remote fan unit has an additional switching output (potential free contact) that can be used to connect other appliances, such as a ventilation system that is available at the site.

The respective ventilation planner is then responsible for the effective operation of the entire ventilation system.

The guarantee of electrical function is maintained as long as the respective specifications are observed.

EB 333

The aim of good ventilation system planning is to extract cooking vapours out of the kitchen area as completely and quickly as possible. To help you plan and install your system correctly, here are a few important notes on system planning from our ventilation experts.

The planning of a ventilation system is significantly determined by the air requirement and air output. The air requirement must be contrasted with the corresponding air output that a ventilation appliance can produce, while taking account of the influence of all the ventilation components involved.

Air requirement needed:

Please observe the local applicable building regulations when configurating ventilation solutions. The air output of a complete ventilation system must be designed according to the air requirement needed. For this, the size of the kitchen and a corresponding air change rate for the volume of space are often used as the basis for planning. We recommend this method only if the distance between the ventilation system and the cooktop is greater than 1.20 m, that is to say, for ceiling ventilation.

- For air extraction operation, the air requirement for the air exchange rate is calculated using a factor of 10.
- However, the calculation is made using a factor of 12 in kitchens where special cooking appliances such as the electric grill, Teppan Yaki or wok are used.
- For air recirculation, the air requirement for the air exchange rate is generally calculated using a factor of 12.

If the distance between the ventilation system and the cooktop is less than 1.20 metres, the factors listed below must be taken into account to ensure that most of the cooking vapours are trapped as soon as they rise from the cooktop:

- The size and architecture of the kitchen: As the size of the room increases, the movements of air in the room also increase and, as a result, the air requirement becomes greater.
- The cooking appliances: The choice of cooktop is the decisive influencing factor. Every cooktop produces different types and amounts of cooking vapours. The wider the cooktop, the higher the output of the ventilation system should be. Above all, the ventilation system must have a sufficient reserve capacity, if special Vario cooking appliances, such as a Teppan Yaki, wok or electric grill, are to be installed, because such appliances can be expected to produce a higher amount of cooking vapours. We therefore also recommend that these special cooking appliances are installed, if possible, in the centre of the cooktop configuration and not at the edge.
- The type of ventilation system: Every type of ventilation system has particular characteristics which influence the air requirement needed. Ventilation systems, such as downdraft ventilation and table ventilation, are characterised by extracting vapours directly from the cooktop. As they rise up, the cooking vapours can therefore not spread as far in the ambient air. In this case, the air output required is usually less than for those types of ventilation system that are 80 cm or further away from the cooktop.
- The operation mode: All Gaggenau ventilation systems can be operated both in exhaust air mode and air recirculation mode, except the ceiling ventilation 200 series AC 230 and AC 270, which are exclusively available in recirculation mode. It should be noted that, in air recirculation mode, the additional activated charcoal air filter leads to a reduction in air output in comparison to exhaust air mode. The larger the surface of the activated charcoal air filter, the more the ventilation system bears comparison in the settraction and noise behaviour with an exhaust air solution. In air extraction mode, the actual air output depends not only on the fan output, but also significantly on the duct system.

Important influencing factors on the air output:

- The fans: Gaggenau ventilation systems are equipped with particularly powerful fans, or they can be combined with correspondingly powerful remote fan units for exhaust air or air recirculation mode. These fans are also very pressure-stable. They overcome possible pressure losses caused by a ducting system and work highly effectively at a low noise level.
- Ducting and installation: To achieve optimum results, the following points should be observed during installation:
- 1. Install duct bends with a minimum clearance of 30 cm from the exhaust air opening.
- 2. Avoid reductions in cross sections.
- 3. For duct bends, use bends that are as wide as possible.
- 4. Only install ducts that have a smooth and flat inner surface.
- 5. Use exhaust air pipes with a diameter of at least 125 mm.
- 6. Pay attention to the use of a short ducting paths as possible.
- 7. Fit wall outlets that have wide fins, wide-meshed grilles and a low back-pressure.
- 8. Ensure sufficient supply air.

AC 270 101

Gaggenau Black Width 105 cm Air recirculation Delivery with ceiling mounting plate

Special accessories AA 200 121

3 activated charcoal filter with highly efficient odour reduction and allergen deactivation.

For air recirculation. AA 200 122

3 regenerable activated charcoal filter with highly efficient odour reduction. Extended change intervall of the activated charcoal filter: regenerable up to 30 times.

Regenerable in the oven at 200 °C. For air recirculation.

Ceiling ventilation 200 series AC 270

- Height adjustable ceiling
- ventilation, when not in use it can be completely lifted onto the ceiling or integrated in the ceiling
- Precision crafted, solid aluminium design
- Energy-saving, low-noise fan
- _ Rim extraction
- Function for automatic,
- sensor-controlled power adjustment depending on the build-up of cooking vapours
- Easy installation on the ceiling with provided ceiling mounting plate Easy maintenance of the filters
- Dimmable, neutral white LED light
- _ for ideal illumination of the cooktop
- Air recirculation

Output

Performance and noise level, output level 3/Intensives Air output according to EN 61591. Sound power level according to EN 60704-3 Air recirculation: 515 / 680 m³/h. 67 / 74 dB (A) re 1 pW.

Features

3 electronically controlled power levels and 1 intensive mode. Remote control is included in delivery. Automatic function with sensorcontrolled run-on function. Interval ventilation, 6 min. Grease filter saturation indicator. Activated charcoal filter saturation indicator. 3 metal grease filters, dishwasher-safe. 3 activated charcoal filters. Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter. Gaggenau Black anodized aluminium. Fan technology with highly efficient, brushless DC motor (BLDC). Easy mounting system for simple installation and alignement. Neutral white LED light (3500 K), continuously dimmable. Light colour in different white tones (2700 - 5000 K) can be adjusted via Home Connect. Lamp output 6x3W. Illuminance 1156 lx continuously dimmable.

Selected digital services (Home Connect)

Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Planning notes

Installation directly on the ceiling with provided ceiling mounting plate. Recommended ceiling height up to 3.50 m.

The ceiling ventilation has to be handled as a room ventilation when distance to cooktop is larger than 120 cm since the direct capture of vapours will be limited.

The needed airflow is given by an air exchange rate of 10 to 12 times the room volume.

A suitable load-bearing substructure is required for securing the extractor hood. Never fit the appliance directly onto plasterboard or similar lightweight

construction materials. Clearance above gas appliances min. 70 cm (more than total load gas

12 kW min. 75 cm).

Clearance above electric appliances min 70 cm

Air recirculation is not recommended in combination with Vario electric grill. Appliance weight: approx. 69 kg.

Connection

Total connected load 250 W. Plan a connection cable.

measurements in mm

Flush integration in the ceiling

A: ≥ 25 mm all around
 B: Depending on the cooking method, residual moisture may escape from the ceiling ventilation even after use. For preventive purposes, we recommend treating the recess in the ceiling with an anti-mould paint.

AC 250 121 Gaggenau Light Bronze Width 120 cm Air extraction / Air recirculation

Included in the price

Necessary installation accessories AA 010 811

Stainless steel

White.

Air recirculation module inclusive

1 activated charcoal filter with highly efficient odour reduction and allergen deactivation.

For air recirculation.

Special accessories AA 200 110

1 activated charcoal filter with highly efficient odour reduction and allergen deactivation.

For air recirculation module AA 200 812/816 and AA 010 811/ AA 012 811.

AA 200 112

1 regenerable activated charcoal filter with highly efficient odour reduction. Extended change intervall of the activated charcoal filter: regenerable up to 30 times. Regenerable in the oven at 200°C.

For air recirculation module AA200812/816 and AA010811/ AA012811.

Installation accessories for air ducting you will find at the pages 285 – 291.

Ceiling ventilation 200 series AC 250

- Discreet integration into the architecture of the kitchen
- Energy-saving, low-noise fan Rim extraction
- Function for automatic,
- sensor-controlled power adjustment depending on the build-up of
- cooking vapours Easy and time saving installation directly in the ceiling
- Easy maintenance of the filters
- Air extraction / Air recirculation

Output

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Air extraction: 458 / 933 m³/h. 56 / 70 dB (A) re 1 pW. Air recirculation: 419 / 637 m³/h. 63 / 72 dB (A) re 1 pW.

Features

3 electronically controlled power levels and 1 intensive mode. Remote control is included in delivery. Automatic function with sensorcontrolled run-on function. Interval ventilation, 6 min. Grease filter saturation indicator. Activated charcoal filter saturation indicator. Metal grease filter, dishwasher-safe. Massive aluminium anodized Gaggenau Light Bronze filter cover. Fan technology with highly efficient, brushless DC motor (BLDC). Turnable blower, air outlet on all four sides possible. Connecting pipe DN 150 round.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Consumption data

Energy efficiency class A+ at a range of energy efficiency classes from A+++ to D. Energy consumption 35.2 kWh/year. Ventilation efficiency class A. Grease filter efficiency class E. Sound level min. 41 dB / max. 56 dB normal mode.

Planning notes

For installation in suspended ceiling. The ceiling ventilation has to be handled as a room ventilation when distance to cooktop is larger than 120 cm since the direct capture of vapours will be limited. The needed airflow is given by an air exchange rate of 10 to 12 times the room volume. A suitable load-bearing substructure is required for securing the extractor hood. Never fit the appliance directly onto plasterboard or similar lightweight construction materials. Recommended minimum gap between appliance and external filter module:100 cm.

For air recirculation an external air recirculation module is required. Clearance above gas appliances min. 65 cm (more than total load gas 12 kW min. 70 cm).

Clearance above electric appliances min. 65 cm.

Air recirculation is not recommended in combination with Vario electric grill. Please ensure when installing the exhaust air ducting that no sharp bends are caused and that the cross-section of the ducting is not constricted in any way. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch. Appliance weight: approx. 37 kg.

Connection

Total connected load 250 W. Connecting cable 1.3 m with plug.

 $\ensuremath{\textbf{A}}\xspace$ The ventilator outlet can be turned in all four directions. measurements in mm

Activated charcoal filters with highly efficient odour reduction and allergen deactivation.

Installation accessories for air ducting you will find at the pages 285 - 291.

Table ventilation 200 series AL 200

- Extendable table ventilation, when not in use can be completely lowered into the worktop
- Perfect cooking and ventilation combination with frameless induction cooktops 80 cm wide for
- flush mounting in a single cut-out Transparent ventilation screen for
- discreet integration in the kitchen space
- Ambient lighting thru the glass edges Guided Air technology ensures
- high vapour catch rate across the whole cooktop

Output

Performance and noise level, output level 3/Intensives Air output according to EN 61591. Sound power level according to EN 60704-3. Odour reduction for air recirculation in accordance with EN 61591. Air extraction: 501 / 775 m³/h

62 / 70 dB (A) re 1 pW. Air recirculation: 447 / 562 m³/h. 65 / 70 dB(A) re 1 pW.

Features

White ambient lighting thru the glass edges, which can be changed to any color via the Home Connect App. Automatic function with sensorcontrolled run-on function. 3 electronically controlled power levels and 1 intensive mode. Grease filter saturation indicator. Activated charcoal filter saturation indicator. 2 large-scale metal grease filters included, easy to remove, dishwasher-safe. Overflow capacity 170 ml in grease filter. Additional capacity 600 ml in the remote fan unit. Activated charcoal filter easily removeable from above for air recirculation system.

Gaggenau Black anodized aluminium frame.

1 user interface to set the power levels and 1 user interface to control the Guided Air technology. Fan technology with highly efficient, brushless DC motor (BLDC). Flexible installation of the fan unit at the front (for a compact wall solution), at the back (without loss of drawer space), or at a distance from the appliance.

Selected digital services (Home Connect)

Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Consumption data

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 36.9 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -Grease filter efficiency class B. Sound level min. 39 dB / max. 62 dB normal mode.

Planning notes

Compatible with frameless cooktops 400 series (CX 482) or 200 series (CI 282 / CI 283), in a single worktop cut-out, for flush mounting. For installation in a single worktop cut-out the installation accessory VA 200 080 must be placed between the appliances. This includes a connection strip and furniture supports that ensure cabinet stability. Compatible with induction cooktops 400 series (CX 482, VI 482) or 200 series (CI 282 / CI 283), in 2 separate cut-outs, for surface mounted installation. For surface mounted installation the accessory AA 200 900 is required.

The table ventilation can be installed in the cabinet or between two (e.g. for an island installation deeper than 100 cm). Width of the cabinets 90 cm, 100 cm or 120 cm.

No upper cabinets should be installed above the table ventilation to maintain optimum performance.

- The following distance should be observed:
- 65 cm from the table ventilation to open shelves
- 50 cm left and right of the table ventilation to the wall or neighbouring tall cabinets.
- 5 cm from the table ventilation frame to the wall.
- 2 cm from the Guided Air suction area to a cabinet wall.

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer. Workton thickness recommended for flush installation in a single cut-out: minimum 16mm - maximum 45mm. The bearing capacity and stability, in the case of thinner worktops in particular. must be supported using suitable substructures. Take into account the appliance weight and additional loads.

Whatever installation situation, the fan unit should always be accessible. To install the fan unit at a distance, the installation kit AA 200 910 is required (with spare covers for closing air outlets). Maximum distance between the table ventilation and the fan unit 3 m.

In air extraction mode a one-way flap with a maximum opening pressure of 65 Pa should be installed. In air extraction mode, always ensure adequate fresh air in the room if the appliance is being operated at the same time as a chimney-vented fireplace.

The pressuredrop resistant blower allows for ductings up to 8 m with 3 x 90° bends while keeping sufficient performance. For optimum performance in air recirculation we recommend an outflow surface area of at least 400 cm². For air recirculation an air recirculation module is required.

Please read additional planning notes on page 256 - 257.

Connection

Total connected load 300 W. Connecting cable 1.3 m, with plug. Power consumption standby/ display off 0.4 W.

Installation accessories for air ducting you will find at the pages 285 – 291.

Vario downdraft ventilation 200 series VL 200

- Can be combined with the cooktops of the Vario 200 series to a harmonic unity
- Highly efficient ventilation system at the cooktop integrated in the worktop
- Function for automatic, sensor-controlled power adjustment depending on the build-up of
- cooking vapoursMinimal planning and easy installationLow-noise system with the motor
- AR 410 110 - Air extraction or air recirculation
- system

Output

Power levels depend on the remote fan unit.

Refer to the "Technical specifications" of the hood for the matching remote fan units for air recirculation or air extraction mode.

Features

Control knobs with illuminated ring. 3 electronically controlled power levels and 1 intensive mode. Automatic sensor-controlled performance adjustment of the ventilation system. Automatic sensor controlled or manual run on function. Large-scale metal grease filter with high grease absorption. Removable, dishwasher-safe grease filter unit. Grease filter and activated charcoal filter saturation indicator. Airflow-optimised interior for efficient air circulation. Interval ventilation, 6 min. Enamelled ventilation grille, dishwasher-safe. Air exhaust bend included in delivery. Overflow 250 ml capacity.

Consumption data

Consumption data is referred to a configuration with the remote fan unit AR 403 122. Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 48.3 kWh/year. Ventilation efficiency class A. Ilumination efficiency class A. Ilumination efficiency class B. Sound level min. 56 dB / max. 71 dB normal mode.

Planning notes

Air recirculation mode in combination with remote fan unit with AR 410 110 or AR 413 122. Air extraction in combination with remote fan unit AR 400 142, AR 401 142 or AR 403 122. For each VL one remote fan unit is recommended. Maximum cooktop width between 2 VL: 80 cm. Vario cooktops like Vario electric grill and Vario gas wok should be placed between 2 VL. In case of Vario electric grill recirculation is not recommended. If installed next to gas appliances, the ventilation moulding LS 041 001 is recommended to ensure maximum performance of the cooktop. When having installed the ventilation moulding LS 041 001 the wok pan WP 400 001 can not be used. Air recirculation is not recommended in combination with Vario electric grill. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Please read additional planning notes on page 266 – 269.

Connection

Connecting cable 1.7 m between VL and remote fan unit.

AD 410 040: Flexibel connecting piece for VL, DN 150 flat

AD 851 041: Connecting piece VL for extension with flat duct DN 150 for extra deep worktop

Good to know - for correct planning and installation

- For depth measurements, take account of the depth of the furniture cavity and worktop overhangs of the kitchen furniture.
- It is also important that ducting is well sealed in order to prevent air leaks, e.g. by using the adequate adhesive tape or using the adequate connecting piece.
- Maximum distance between the Vario downdraft ventilation and the remote fan unit: Cable length in between 1.7 m
- Vario cooktops like Vario electric grill or Vario gas wok should be placed between 2 VL.
- In case of Vario electric grill air recirculation is not recommended.

- With the Vario downdraft ventilation, the ducting can be connected straight down (1) or to the rear using additional connecting pieces (2) and (3). These are available as special accessories, see below. For the total overall dimensions in the furniture, please also take into account the individual dimensions and position of the ducts and the remote fan unit. The remote fan unit can be turned in all directions, depending on the desired direction for the exhaust air or filter removal.

1: Direct installation

740+**A**

- Direct installation
 Installation with extension for extra deep worktop and plastic ducting:

 AD 851 041 (Connecting piece for extension)
 AD 857 040 (Flat duct connecting piece, plastic)
 AD 857 030 (Flat duct bend 90° vertical, plastic)

 Installation with extension for extra deep worktop and metal ducting:

 AD 851 041 (Connecting piece for extension)
 AD 851 041 (Connecting piece for extension)
 AD 851 041 (Connecting piece for extension)
 AD 854 000 (Flat duct connecting piece, metal)
 AD 854 030 (Flat duct bend 90° vertical, metal)

A: ≥ 50mm B: Connecting piece

VL 200 with AR 410 110 remote fan unit

Wall installation, worktop depth 65 cm, access to the filters for replacement from the front.

Good to know

- Allow accessibility to the charcoal filters in the lower cabinet for their replacement.
- Additionally, if the plinth is higher than 80 mm, the external remote fan unit has to be elevated to enable access to the filters. If the plinth is 80 mm high, the remote fan unit can be placed directly on the floor.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 400 cm²).

List of components

- 1 x AR 410 110 (remote fan unit air recirculation)
- 1 x AD 410 040 (flexibel connecting piece)

Order as set (appliances and accessories): SET1VL2301

EB 333

Planning example 2 (air recirculation) VL 200 with AR 413 122 remote fan unit

Good to know

- Wall or island installation.
- Allow accessibility to the charcoal filters in the lower cabinet for their replacement. - The recommended minimum distance between filter openings and cupboard wall
- if there is no ventilation grille directly in front: 15 cm.
- For optimum performance, the recirculated air requires sufficient space to escape (outflow surface area of at least 400 cm²).

List of components

- 1 x AR 413 122 (remote fan unit air recirculation)
- 1 x AD 410 040 (flat flexible connecting piece)
- 1 x AD 857 015 (flat duct 50 cm)
- 1 x AD 857 040 (flat duct connecting piece)
- 1 x AD 857 041 (flat duct adapter round)
- 1 x AD 990 090 (adhesive tape)

AA 200 812/816 and AA 010 811/ AA 012 811.

AA 200 112

1 regenerable activated charcoal filter with highly efficient odour reduction. Extended change intervall of the activated charcoal filter: regenerable up to 30 times.

Regenerable in the oven at 200°C. For air recirculation module AA 200 812/816 and AA 010 811/ AA 012 811.

Installation accessories for air ducting you will find at the pages 285 – 291.

Island hood 200 series AI 240

- Stainless steel hood with glass cover fitting to oven 200 series
- Highly efficient vapour collection by recessed filters
- Energy-saving, low-noise fan
 Perforated sheet metal filter with
- High grease absorption
 Function for automatic, sensor-controlled power adjustment
- depending on the build-up of cooking vapours
- Dimmable, neutral white LED light
- for ideal illumination of the cooktop - Air extraction or air recirculation
- system

Output

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Air extraction: 641 / 988 m³/h. 64 / 72 dB (A) re 1 pW. Air recirculation: 448 / 530 m³/h. 69 / 72 dB (A) re 1 pW.

Features

3 electronically controlled power levels and 1 intensive mode. Automatic function with sensorcontrolled run-on function. Grease filter saturation indicator. Activated charcoal filter saturation indicator. Perforated sheet metal filter, dishwasher-safe. Interval ventilation. 6 min. Neutral white LED light (3500 K), continuously dimmable. Light colour in different white tones (2700 – 5000 K) can be adjusted via Home Connect. Lamp output 4x3W. Illuminance 650 lx continuously dimmable. Fan technology with highly efficient, brushless DC motor (BLDC). Integrated sound insulation for quiet operation. Airflow-optimised vapour collection area with slightly inward facing filters. The package includes an one-way flap. Easy mounting system for simple installation and alignment.

Selected digital services

(Home Connect) Cooktop-based ventilation control (with suitable hood) Remote control and monitoring Remote diagnostics

Please read additional information on Home Connect on page 411.

Consumption data

Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 48.8 kWh/year. Ventilation efficiency class A. Ilumination efficiency class A. Grease filter efficiency class B. Sound level min. 43 dB / max. 64 dB normal mode.

Planning notes

The package includes the mounting kit and the two-part chimney with the dimensions from 664 mm to 844 mm. Individual planning solutions can be implemented using the special accessory chimney extension AD 200 326 in combination with extension for mounting kit AD 223 346. Clearance above gas appliances min. 65 cm (more than total load gas 12 kW min. 70 cm). Clearance above electric appliances min. 55 cm.

The air recirculation module with activated charcoal filter can be installed on the inner chimney. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Connection

Total connected load 272 W. Connecting cable 1.3 m with plug.

* Suitable for ceiling heights from 2.34 m to 2.52 m; Specifications refer to the distance of 1.60 m from the floor to the lower edge of the hood.

AI 240 with AA 200 816

* Suitable for ceiling heights from 2.42 m to 2.64 m; Specifications refer to the distance of 1.60 m from the floor to the lower edge of the hood.

* Suitable for ceiling heights from 2.78 m to 3.15 m; Specifications refer to the distance of 1.60 m from the floor to the lower edge of the hood.

Special accessories AA 250 112

2 regenerable activated charcoal filter with highly efficient odour reduction. For air recirculation.

Extended change intervall of the activated charcoal filter: regenerable up to 30 times.

Regenerable in the oven at 200 °C. AA 250 113

2 activated charcoal filter with highly efficient odour reduction and allergen deactivation.

For air recirculation.

Installation accessories for air ducting you will find at the pages 285 – 291.

Wall-mounted hood 200 series AW 250

- Angled vapour screen provides particularly generous free space above the cooktop
- Filter cover with easy to clean glass front
- Glass cover fitting to oven 200 series
- Energy-saving, low-noise fan
- Vapours can be caught efficiently thanks to two suction areas on the underside and front
- The glass trayel can be extended forward to increase the area for catching vapours during particularly intensive cooking
- Function for automatic, sensor-controlled power adjustment depending on the build-up of
- cooking vapoursDimmable ambient lighting allows
- light to be adjusted individually - Air extraction or air recirculation
- system

Output

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Air extraction: 529 / 990 m³/h. 57 / 70 dB (A) re 1 pW. Air recirculation: 461 / 670 m³/h. 68 / 78 dB (A) re 1 pW.

Features

3 electronically controlled power levels and 1 intensive mode. Automatic function with sensor-controlled run-on function. Grease filter and activated charcoal filter saturation indicator. Interval ventilation, 6 min. Metal grease filter, dishwasher-safe. Glass filter cover in Gaggenau Anthracite. 2 activated charcoal filter fitted in appliance ex factory. Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter. Neutral white LED light (3500 K), continuously dimmable. Lamp output 2x3W. Illuminance 519 lx. Indirect LED light (3.000 K), dimmable. Fan technology with highly efficient, brushless DC motor (BLDC). Integrated sound insulation for quiet operation. Easy to clean inner frame. Easy mounting system for simple installation and alignment.

Selected digital services

Flat kitchen hood 200 series AF 210

- Unobtrusive visor hood design thanks to integrated glass sheet in the steam screen
- Especially quiet operation thanks to integrated sound insulation
- Steam screen extends by touching the handle bar
- Especially high air output
- Energy-saving, low-noise fan
 Function for automatic.
- sensor-controlled power adjustment depending on the build-up of cooking vapours
- Dimmable, neutral white LED light
- for ideal illumination of the cooktop The patented lowering frame allows the visor hood to disappear
- completely into the upper cabinet Air extraction or air recirculation
- system
 Air recirculation module with activated charcoal filter: quiet and highly
- charcoal filter: quiet and highly efficient air recirculation solution with odor reduction as in air extraction mode and long replacement intervals

Output

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3. Appliance width 90cm Air extraction: 517 / 965 m³/h 57 / 71 dB(A) re 1 pW Air recirculation: 506 / 876 m³/h 62 / 69 dB(A) re 1 pW

Appliance width 60cm Air extraction: 515 / 953 m³/h 57 / 71 dB(A) re 1 pW Air recirculation 497 / 885 m³/h 62 / 69 dB(A) re 1 pW

Features

Controls at front. 3 electronically controlled power levels and 1 intensive mode. Automatic function with sensorcontrolled run-on function Grease filter saturation indicator. Stainless steel grease filter, dishwasher-safe. Neutral white LED light (3500 K), continuously dimmable. Lamp output 3 x 1.5W. Illuminance 355 lx. Light can be switched on separately. Fan technology with highly efficient, brushless DC motor (BLDC). Integrated sound insulation for quiet operation. The fan is activated when the steam screen is extended. Patented technology for extension of the steam screen. Extendable steam screen 198 mm. Airflow-optimised interior for efficient air circulation and ease of cleaning. Patented easy mounting system for simple installation. The package includes an one-way flap.

Consumption data

Consumption data is referred to AF 210 192 / 162. Energy efficiency class A at a range of energy efficiency classes from A+++ to D. Energy consumption 41.4 / 40.3 kWh/year. Ventilation efficiency class A. Illumination efficiency class A. Grease filter efficiency class B. Sound level min. 41/42 dB / max. 57 dB normal mode.

Planning notes

For air recirculation an external air recirculation module is required. Patented air recirculation module with activated charcoal filter can be installed in the upper cabinet. The activated carbon filter can be changed from the front by simply pulling out the activated charcoal filter. The door of the upper cabinet must be fully open in order to change the activated charcoal filter.

To be installed in an upper cabinet without base.

The required cavity depth of the upper cabinet together with the lowering frame measures 335 mm.

The required cavity height of the upper cabinet together with the lowering

frame measures 600 mm. Clearance above gas appliances

min. 65 cm (more than total load gas 12 kW min. 70 cm).

Clearance above electric appliances min. 43 cm.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Connection

Total connected load 266/264 W Connecting cable 1.8 m, pluggable.

Width 52 cm Air extraction / Air recirculation

Necessary Installation accessories AA 211 812

Patented air recirculation module including 1 activated charcoal filter with highly efficient odour reduction and allergen deactivation. For air recirculation.

Special accessories

AA 200 510 Remote control for canopy extractor AC200

AA 210 110

1 activated charcoal filter with highly efficient odour reduction and allergen deactivation. For air recirculation module AA 211 812.

Installation accessories for air ducting you will find at the pages 285 – 291.

Canopy extractor 200 series AC 200

- Can be integrated invisibly in upper cabinet
- Energy-saving, low-noise fanRim extraction with flat and
- easy-to-clean glass cover
- Dimmable, neutral white LED light
- for ideal illumination of the cooktop - Air extraction or air recirculation
- system
- Energy efficiency class A++

Output

Performance and noise level, output level 3/Intensive: Air output according to EN 61591. Sound power level according to EN 60704-3.

Appliance width 86 cm Air extraction:

610 / 800 m³/h. 64 / 70 dB (A) re 1 pW. Air recirculation: 540 / 790 m³/h. 72 / 77 dB (A) re 1 pW.

Appliance width 70 cm

Air extraction: 575 / 775 m³/h. 64 / 70 dB (A) re 1 pW. Air recirculation: 540 / 740 m³/h. 73 / 78 dB (A) re 1 pW.

Appliance width 52 cm

Air extraction: 540 / 730 m³/h. 64 / 70 dB (A) re 1 pW. Air recirculation: 530 / 690 m³/h. 72 / 77 dB (A) re 1 pW.

Features

3 electronically controlled power levels and 1 intensive mode. Remote control is available as a special accessory. Interval ventilation, 6 min. Run-on function, 6 min. Grease filter saturation indicator. Metal grease filter, dishwasher-safe. Glas filter cover. Neutral white LED light (4000 K), dimmable. Lamp output 2 x 1 W. Illuminance 266 lx. Fan technology with highly efficient, brushless DC motor (BLDC).

Consumption data

Energy efficiency class A++ at a range of energy efficiency classes from A+++ to D. Energy consumption 31.4/30.3/29.6 kWh/year. Ventilation efficiency class A. Ilumination efficiency class A. Grease filter efficiency class D. Sound level min. 41/42/44 dB / max. 64/65/67 dB normal mode.

Planning notes

Patented air recirculation module with activated charcoal filter can be installed in the upper cabinet. The activated carbon filter can be changed from the front by simply pulling out the filter drawer.

The door of the upper cabinet must be fully open in order to change the activated charcoal filter.

Can be integrated invisibly in upper cabinet.

Vario cooktops with intensive production of vapours like VR/VP should be placed in the middle beneath the hood (in this case air recirculation is not recommended). Clearance above gas appliances min. 65 cm (more than total load gas 12 kW min. 70 cm).

Clearance above electric appliances min. 50 cm.

When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

Connection

Total connected load 172 W Connecting cable 1.0 m with plug.

View of upper cabinet from above with AC 200 and AA 211 812

Cross-section of upper cabinet with AC 200 and AA 211 812

Accessories and special accessories for extractors

AA 442 810

Air recirculation module inclusive 2 activated charcoal filter with highly efficient odour reduction. For air recirculation. Can be combined with island and wall-mounted hood AW 442. Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). Extended change interval for the activated charcoal filter (approx. 1-1.5 years depending on cooking frequency). For installation on the inner chimney. Consisting of filter bracket, 2 activated charcoal filter, flexible hose and 2 hose clamps.

AA 200 812

Combinable with wall mounted hood AW 240.

AA 200 816

Combinable with island hood AI 240.

Air recirculation module inclusive 1 activated charcoal filter with highly efficient odour reduction and allergen deactivation.

Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter. Extended change interval for the activated charcoal filter. For installation on the external chimney. Includes design panel, wall fastening

(AA 200 812), activated charcoal filter, flexible hose and 2 hose clamps.

AA 211 812

Patented air recirculation module including 1 activated charcoal filter with highly efficient odour reduction and allergen deactivation. For air recirculation.

Can be combined with flat kitchen hood series 200/canopy extractor 200 series.

Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter. Extended change interval for the

activated charcoal filter. For assembly in the upper cabinet. Connecting pipe DN 150 round. Consisting of filter housing with design panel, activated charcoal filter, flexible hose and 2 hose clamps.

Cooktops

AA 010 811 Stainless steel AA 012 811 White

For air recirculation.

Can be combined with ceiling ventilation AC 250 and AC 402. Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter. Connecting pipe DN 150 round Pipe connection at the front, side or top. Recommended minimum gap between filter openings and wall: 100 cm.

Combinable with the table ventilation AL 200 180.

AA 200 890

Combinable with the table ventilation AL 200 190.

Recirculation module including activated charcoals filters with highly efficient odour reduction and allergen deactivation.

Easily removal from the top of the table ventilation

Highly efficient odour reduction for cooking applications with complex odour molecules (e.g. fish and seafood). The filter retains an extremely high amount of airborne pollen and deactivates allergens, which are retained by the filter.

AD 442 392 for AW 442 AD 442 396 for AI 442 AD 200 392 for AW 240 AD 220 396 for AI 240 Ceiling collar for air chimneys Stainless steel/aluminium-lacquered

Covers the fixing screws of wall and island air chimneys as well as uneven gaps at not exactly horizontal ceilings. Allows the installation of customised one-piece wall chimneys and island chimneys without telescope.

Features

Ceiling fixture for duct and clip-on cover in the color of chimney.

Planning notes

Available for most of the Gaggenau chimney dimensions to fit with standard chimneys.

Ventilation moulding

AA 414 010 Ventilation moulding for VL414 next to gas appliance.

Ventilation moulding LS 041 001 Ventilation moulding for VL 200 next to gas appliance.

AA 200 882

Combinable with the table ventilation AL 200 180.

AA 200 892

Combinable with the table ventilation AL 200 190.

Regenerable air recirculation module including activated charcoal filters. Easily removal from the top of the table ventilation for regenerating. Regenerable in the oven at 200°C. Extended change interval of the activated charcoal filter: regenerable up to 30 times.

Extractors

Accessories and special accessories for extractors

AA 210 492

Lowering frame for 90 cm flat kitchen hood

AA 210 460 Lowering frame for 60 cm flat kitchen

hood Can be combined with flat kitchen

hood series 200.

The patented lowering frame allows the flat kitchen hood to disappear completely into the upper cabinet. For assembly directly on the kitchen wall or reinforced upper cabinet. For assembly in the upper cabinet. The required cavity depth of the upper cabinet together with the lowering frame measures 335 mm.

In combination with a back wall panel >5 mm the lowering frame needs to be lined and the cavity depths must be adapted accordingly.

AA 210 491

Assembly kit for 90 cm upper cabinet Can be combined with the 90 cm wide flat kitchen hoods 200 series. Flat kitchen hood of 200 series For left/right assembly in upper cabinets.

For assembly in the upper cabinet. If the lowering frame AA 210 492 is used, the assembly kit is not needed

AA 200 900

Kit for surface mounted installation AL 200 Including 2 trims, each 5 mm width For the 80 cm and 90 cm variant Gaggenau Black

Measurements in mm

AA 200 910

Installation kit for fan unit at a distance (3m maximum) Combinable with the table ventilation AL 200

VA 200 080

Combinable with the table ventilation AL 200 180.

VA 200 090

Combinable with the table ventilation AL 200 190.

Installation kit for installation in a single worktop cut-out. Consists of a connection strip and furniture supports that ensure cabinet stability. Adjustable for cabinet widths from

90 cm, 100 cm, 120 cm.

AA 409 401

Furniture support for table ventilation AL 400 90 cm Can be combined with table ventilation AL 400. Recommended as bearer for the worktop, instead of a cabinet frame.

AA 409 431

Furniture support for table ventilation AL 400 120 cm Can be combined with table ventilation AL 400. Recommended as bearer for the worktop, instead of a cabinet frame.

Accessories and special accessories for extractors

AA 400 510 Window contact switch Can be combined with motorless 210 appliances 400 series. When installing a ventilation hood with air extraction mode and a chimneyvented fireplace, the power supply line Length 5 m of the ventilation appliance needs a suitable safety switch. The window contact switch is suitable for this purpose. The ventilation appliance only works $\left[\right]$ 42 when the window is open if a window contact switch is connected. The lighting works even if the window is closed.

AA 200 510 Remote control for canopy extractor AC 200

AA 010 410

Air exhaust grille air recirculation Stainless steel-coloured, 90 cm, including installation fittings, height adjustable.

Intelligently selecting and installing the duct system not only has a very positive effect on the output of the ventilation system; it also minimises the noise generated. It is therefore decisive for the efficiency of the entire ventilation system.

The duct type.

In Gaggenau's accessories catalogue, customers can select the type of duct appropriate to their needs, whether aluflex pipe, round duct or a flat duct system. Depending on the duct type, they can choose from the nominal sizes DN 150 and DN 200. For maximum output with minimal noise, the diameter should always be as large as possible.

For straight ducting, the use of plastic or metal ducts with smooth, level inner surfaces is recommended. These enable a laminar flow of air during extraction, without air turbulence. For sections that are not straight and for bends, aluflex pipe are preferred because they make it possible to avoid hard edges.

Where space limitations are a concern, the first choice is the Gaggenau flat duct system. The remarkable design with special conducting fins in the bends and junction pieces allow for a very low hight and large nominal size, thus ensuring very efficient air circulation. This also applies in situations where there are many bends. We strongly discourage the use of other flat ducts due to the high output losses in duct bends, duct corners and junction pieces.

Spiral and corrugated ducts should definitely not be used. In addition to displaying the worst flow conditions, these types also tend to flutter and thus generate noise.

The duct diameter.

A good guideline here is: The duct diameter should be as large and constant as possible, while the ducting should be as short and straight as possible. The wall outlet must correspond to the duct diameter.

The building regulations.

Please observe the local applicable building regulation when configurating ventilation solutions.

The plastic flat duct complies with the Needle Flame Test (according to IEC 60695-11-5), the V2 flammability class (according to UL94) and the B1 and B2 building material class (DIN 4102-1) depending on the parts.

The metal ducts are particularly suitable for Vario downdraft and Table ventilation in countries with increased fire protection requirements. The metal ducts are non-combustible and suitable for all combinations.

AD 857 015 Flat duct Plastic, low flammability DN 150 flat Length 500 mm AD 857 010 Flat duct Plastic, low flammability DN 150 flat Length 1000 mm

AD 854 010 Flat duct Metal DN 150 flat Length 1000 mm

Features

Sealing is pre-assembled on each side.

Planning notes

Suitable for flat duct bends. To connect 2 flat ducts, a flat duct connecting piece is required. If the removal of the seal is necessary, the connection must be fastened and sealed with aluminium adhesive tape.

inor

89

AD 857 040

Flat duct connecting piece Plastic, low flammability DN 150 flat Connector sleeve to connect other plastic flat ducts together.

Features

Integrated sealings for full airtightness without necessity for any adhesiv tape. Easy-to-connect via time saving click mechanism.

Connecting cable length	(m)	1.75
Cooktop-based ventilation control	(11)	•3
		•
Home network integration for digital services (Home Connect) wireless via WiFi. 4 Connection		
Total connected load	(W)	depending on fan unit
Radio frequency interference-suppressed		•

Radio frequency interference-suppressed

• Standard – Not available

¹ Values refers to the configuration VL 414 with the remote fan unit AR 403 122.

² Installation accessory

³ In Combination with suitable cooktop.

⁴ The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country.

 ${}^{\scriptscriptstyle 5}$ The knob must be ordered separately.

* Energy efficiency class: at a range of energy efficiency classes from A+++ to D.

Cooling appliances

RY 492 305

With fresh cooling close to 0 °C Fully integrated Niche width 91.4 cm, Niche height 213.4 cm Cooling section with two doors and one fully extendable freezing drawer

Included in the price

- 1 egg holder with lid
- 1 ice cube scoop

Installation accessories

RA 421 912 Stainless steel door panels with handles For RY 492, panel thickness 19 mm. RA 423 340

Side trims, 2 pieces, for RY and RB. RA 425 110

RA 425 II

Handle bar, stainless steel, long With 3 mounts, length 1131 mm, height 49 mm, drilling distance between each mount 554 mm.

RA 425 910

Handle bar, stainless steel, short For RB/RY 492 and RW 222, with 2 mounts, length 810 mm, height 49 mm, drilling distance between the mounts 787 mm.

RA 428 912

Stainless steel door panels, handleless For RY 492, panel thickness 19 mm.

RA 460 000 Accessory for side-by-side installation. Not required if appliances are installed more than 160 mm apart from each other. Included in delivery for RF and RW.

RA 460 013

Additional side heating element 230 V. Required if appliances are installed with a distance greater than 16 mm and less than 160 mm next to each other and for all built-in situations in a very humid environment. Not required if appliances are installed more than 160 mm apart from each other.

RA 460 030

Connecting element for vertically split fronts (for fridge-freezer combination). RA 464 913

Ventilation grille stainless steel For RB/RY492. Vario fridge-freezer combination 400 series RY 492

- Stainless steel interior with solid anthracite aluminium elements
- Warm white and glare-free LED light spots
- Opening assist for door with two options:1. Push-to-open function for
- integration into handleless furniture front
- 2. Pull-to-open function to facilitate opening the door using a handle
 Flat stainless steel inner doors
- Almost invisible rail system for shelves and door racks for flexible positioning
- Solid anthracite aluminium door racks
- 1 fresh cooling drawer close to 0 °C with manually adjustable temperature and 1 fresh cooling drawer with manually adjustable humidity
- Integrated ice maker with fixed inlet water connection
- 1 asymmetrically split glass shelf, height adjustable
- Fully extendable freezer drawer with practical divider in anthracite
- TFT touch displayTotal volume 552 litres

Handling

TFT touch display operation. Clear text display.

Technical features

Dynamic cold air distribution. Automatic defrosting with defrost water evaporation. Cushioned door closing system. Activated charcoal air filter. Rest mode certified by Star-K. When rest mode is active, the appliance can only be opened using a handle. Open-door and malfunction alarm.

Selected digital services

(Home Connect) Remote control and monitoring. Remote diagnostics.

Please read additional information on Home Connect on page 411.

Cooling

No-Frost technology with fast cooling. Temperature adjustable from $+2^{\circ}$ C to $+8^{\circ}$ C 1 safety glass shelf, white glass, individually adjustable in height. 1 asymmetrically split safety glass shelf, with manual height adjustment. 1 integrated shelf with satin-finished glass. 4 brilliant LED light spots with warm white, glare-free light (3500 K) within cooling area and drawers. Flat door rail system with fully flexible positioning of door racks. 6 height-adjustable door racks, 2 of which are extra deep. Total volume all refrigerator compartments 386 litres.

Special accessories RA 430 100

Storage container with transparent lid, anthracite.

RA 450 012 Activated charcoal filter for water filter

system For RB, RY, RF.

Fresh cooling close to 0 °C

1 fully extendable fresh cooling drawer close to 0 °C with transparent front, illuminated. Cushioned closing system. Temperature can be adjusted manually. Ideal for meat, fish and poultry.

Fresh cooling

1 fully extendable fresh cooling drawer with transparent front, illuminated. Cushioned closing system. Humidity can be adjusted manually. Ideal for fruit and vegetables.

Freezing

No-Frost technology with fast freezing at -30 °C. Temperature adjustable from -14 °C to -24 °C. 4-star freezer compartment. Freezing capacity 14 kg/24 h. Storage time after a malfunction 13 h. 2 fully extendable drawers, one of them inside. Outer drawer with synchronously running pull-out rails. Interior lighting with 2 LED light spots, warm white light. Volume 166 litres.

Ice maker

Integrated in the freezer compartment, with fixed inlet water connection. Particle filter for water inlet, integrated in ventilation grille area. Saturation indicator shown in TFT touch display. Can be switched off. Ice cube production approx. 1.6 kg/24 h. Removable ice storage container with approx. 3 kg capacity.

Consumption data

Energy efficiency class F at a range of energy efficiency classes from A to G. Energy consumption 415 kWh/year. Noise level 42 dB (A) re 1 pW.

Planning notes

Flat hinge. Door opening angle of 115°, fixable at 90°. Max. door panel weight: Each door 67 kg. Drawer 12 kg. Shut-off valve for water connection must be planned next to the appliance and always be accessible. If the water pressure exceeds 0.8 MPa (8 bar), connect pressure relief valve between water tap and hose set.

Please read additional planning notes on page 328 – 335.

Connection

Total connected load 0.300 kW. Connecting cable 3.0 m, pluggable. Water inlet. Supply hose 2.0 m with 3/4 " connection. Water pressure 2 to 8 bar.

RB 492 305

With fresh cooling close to 0 °C Fully integrated Niche width 91.4 cm. Niche height 213.4 cm Cooling section with one door and one fully extendable freezing drawer

Consumption data

Energy efficiency class F at a range of energy efficiency classes from A to G. Energy consumption 401/355/308 kWh/year Noise level 42 dB (A) re 1 pW.

Planning notes

Flat hinge. Door hinge left, reversible. Door opening angle of 115°, fixable at 90° In case of door opening angle of 90°, the drawers have restricted access and the standard ice storage container cannot be removed. A small ice storage container (RA 448 220) is available to ensure access. This change must be done prior to fixing the door. Max. door panel weight 29/41/59 kg. Shut-off valve for water connection must be planned next to the appliance and always be accessible. If the water pressure exceeds 0.8 MPa (8 bar), connect pressure relief valve between water tap and hose set.

Please read additional planning notes on page 328 - 335.

Connection

Total connected load 0.300 kW. Connecting cable 3.0 m, pluggable. Water inlet. Supply hose 2.0 m with 3/4 " connection. Water pressure 2 to 8 bar.

The maximum door panel dimensions are based on a clearance of 3 mm.

RF 410 304

Bottle storage

A: Suitable area for storage of magnum bottles in standard tray configuration B: 0.75 litres

Measurements in mm

(B) ·

EB 333

The side walls of the adjacent cabinetry have to be dimensionally stable, as the Vario cooling appliances are secured in the niche with only an anti-tilt bracket on the top back and on the bottom at the side.

Vario cooling appliances can be installed handle to handle as a side-by-side combination. In this case the side-by-side installation kit RA 460 000 is required. If the distance between the appliances is greater than 16 mm or less than 160 mm or the environment very humid the additional side heating element RA 460 013 needs to be installed between the appliances to avoid condensation.

If the appliances are combined hinge to handle in a very humid environment the additional side heating element RA 460 013 is required as well. It can be omitted if the distance between the appliances is greater than 160 mm. The additional side heating element RA 460 013 does not take up any additional space. It is already included in the niche dimensions.

If the Vario cooling appliances are joined together hinge to hinge an additional stable side wall must be foreseen.

If restrictions in use are accepted (no simultaneous opening of the doors possible) the appliances can be joined together directly, using the side-by-side installation accessory RA 460 000.

When installing a Vario cooling appliance from the 400 series handleless next to a BO/BM/BS/CM from the oven 400 series, a minimum lateral distance of 30 mm is required, if the door of the Vario cooling appliance opens towards the BO/BM/BS/CM. When installing a Vario cooling appliance from the 400 series next to a BO/BM/BS from the ovens 400 series, a lateral distance of 60 mm is required, if the BO/BM/BS retrofitted handle is on the same side as the Vario cooling appliance door hinge. For the same installation next to a BOP/BMP/BSP from the ovens 200 series, a distance of 40 mm is required.

Door opening angle

To ensure correct kitchen planning it is essential to take into account the opening angle of the appliance door (plus fitted cabinet door and handle). There should be no possibility of collision with other kitchen furnishings (worktops, handles of other cabinetry etc.) or parts of the room (walls, protrusions etc.).

The space needed for the hinge and the consequential distance to the adjacent cabinetry and its handle can, depending on the panel thickness, be seen in the following drawing. The drawing assumes a panel thickness of 19 mm. If a collision occurs, the following options are available to remedy the situation: Restrict the door opening angle to 90° (standard 115°). Pin to restrict the angle is enclosed with the appliance. Due to limitation in use, it is not recommended to install a freezer (RF 411, RF 461, RF 463, RF 471) next to a wall which requires a door angle of 90° or any other installation which requires a 90° door angle as drawers can 't be pulled out completely or removed. If the restrictions in use are accepted, the ice storage container must be exchanged for the small ice storage container (RA 448 220). This must be done prior fixing the door.

Fit a spacer between the appliance and the cabinetry that it would collide with. Rearrange surrounding cabinetry or appliance.

The hinge travel and resulting clearances from adjacent furniture units and handles can be found from the drawing while allowing for the thickness of the front panel. In the drawing, a furniture unit front panel thickness of 19 mm was assumed.

Wall clearance RB 492/RY 492

In the drawing, a unit front thickness of 19 mm and a Gaggenau unit handle of 49 mm were taken as a basis.

Wall clearance RB 472/RC/RF/RW

In the drawing, a unit front thickness of 19 mm and a Gaggenau unit handle of 49 mm were taken as a basis.

Notes:

- The adjustable feet have an adjustment range of +35 mm to -13 mm.
 The standard height displayed in the pictures is 0 mm.
- For proper ventilation of the appliance, the clearance between the floor and bottom edge of the cabinet front must be at least 100 mm.
- The panel thickness of customised doors can range from between 19 mm and 38 mm (in the picture 19 mm).

Energy Label | e Connect | Accesso

Unlike conventional built-in appliances, Vario cooling appliances stand on the floor. This means that the installation niche is a space in a line of kitchen units.

Installation niche

The specified dimensions of the installation niche must be observed to guarantee the proper installation of the appliance and the design of the cabinet front. It is particularly important that the installation niche is square. The side walls must be smooth, not have any protrusions or unevenness. Use the appropriate tools, e.g. spirit level, diagonal measurements, etc. to determine whether the installation niche is square.

The side walls and the crown of the installation niche must be at least 16 mm thick.

Installation niche for an individual appliance:

A Area for installation the water connection

B Area for installation the electrical connection must be outside the niche
 C Depth of installation niche, depending on kitchen design.

Depth of installation niche, depending on kitchen design. C = 610 mm minimum!

X Width of installation niche, refer to the table below for more details:

Appliance type	Width of the niche X
451 mm	457 mm
603 mm	610 mm
756 mm	762 mm
908 mm	914 mm

Installation niche for a side-by-side solution:

In a side-by-side solution, there are many ways to combine the appliances. The width of the installation niche is calculated from the sum of the widths of the individual appliances. The height and depth of the installation niche correspond to the specifications for the individual appliances. It is important to comply with the dimensions in the area set aside for electric and water connections. For the precise dimensions, please refer to the details given for individual appliances.

Location

The appliance should be installed in a dry, well ventilated room. The location of the appliance should not be subject to direct sunlight or near a source of heat, such as a cooker, a radiator, etc.

If installation next to a heat source is unavoidable or observe the following minimum distances from the heat source:

- 3 cm to electric or gas cookers.
- 3 cm to electric or gas ovens.
- 30 cm to an oil-fired or solid-fuel cooker.

The floor of the installation location must not give way; if required, reinforce floor. To ensure that the ice maker functions correctly, the appliance must be upright.

Surface

To ensure that the appliance is installed securely and functions properly, the surface must be level and even.

The floor must consist of a hard, rigid material.

The floor in the installation area must have the same height as the floor in the rest of the room.

Due to the heavy weight of a fully loaded appliance, the floor beneath must be stable.

If in doubt, consult an architect, structural engineer or construction expert.

Neighbouring cabinetry

The new appliance is screwed firmly in place with the neighbouring cabinet parts. Care should be taken to ensure that all cupboards onto which something is fastened, are connected firmly to the floor or the wall.

The thickness of the plinth can be a maximum 19 mm.

Base area

Important!

Poor ventilation leads to damage to the appliance!

Under no circumstances is it permitted to cover the air inlets and the exhaust air outlets of the appliance in the lower base area. You must observe the minimum distance of 100 mm between the upper edge of the floor and the bottom edge of the cabinet door of the appliance. Take this into consideration also when adjusting the appliance feet.

In relation to the standard height, the maximum height of the base board is 102 mm. The plinth can be maximum 19 mm thick.

Adhesive connectors are supplied on the front panel of the appliance for fitting the base board.

The air inlets and the exhaust air outlets of the appliance are located above the base board. They must not be covered.

Base detail

Based on the standard appliance height, the height of the plinth is 102 mm. Maximum plinth thickness 19 mm.

For design reasons, it may be necessary to increase the distance between the upper edge of the floor and the bottom edge of the cabinet door of the appliance, so that it extends beyond the standard dimension of 102 mm.

The maximum dimension is 181 mm. If this is the case, air inlets and exhaust air outlets would become visible!

Crown

- The height of the cabinet door on the appliance is dependent on:
- the overall height of the appliance,
- the distance from the bottom edge of the cabinet door to the floor,
- the appliance type (one-door or multi-door appliances).
- The overall height of the appliance is 2.029 mm.

The height can be adjusted within a range of -13 mm to +35 mm. You must observe the minimum distance of 100 mm between the upper edge of the floor and the bottom edge of the cabinet door of the appliance.

This height can vary depending on the conditions at the site. It is possible, e.g. for design reasons, to lengthen the cabinet door upwards by extending it beyond the top of the appliance.

Important!

It must be ensured that the crown of the installation niche always has a depth of at least 100 mm (measured from the front edge of the appliance). Only then can the secure installation of the appliance in the installation niche be guaranteed.

The cabinetry, the height of the base board, the overall height of the kitchen and other determining dimensions of the kitchen must be taken into account, in order to plan the exact positioning of the cabinet door so that the appliance integrates perfectly into the overall picture of the kitchen.

The following diagrams show the basic dimensions of the special accessories door fronts/door front frames for various appliances.

The dimensions of the doors shown are designed for the following basic specifications

- Height of the base board: 102 mm _
- Overall height of the installation niche: 2.134 mm
- _ Gap: 3 mm
- Panel thickness: 19 mm

These specifications provide you with a good starting point for a variety of kitchen designs.

When designing a customised cabinet door, please ensure that the back of the cabinet door is visible to a height of 205 mm over the floor when opening the appliance door and adapt to the front design. All diagrams are also valid for doors without handle.

Important!

The following diagrams are not a substitute for detailed designs. Compliance with specified requirements relating to kitchen design is essential.

The door panel thickness is 19 mm. The maximum door panel dimensions are based on a clearance of 3 mm, B: Width of the side frame parts of the door panel can be between 65 mm and 82 mm.

The door panel thickness is 19 mm.

The maximum door panel dimensions are based on a clearance of 3mm, based on a single recess.

based on a single recess. A: The cut-out for the ice and water dispenser is designed so that it is horizontally and vertically centred. B: Width of the side frame parts of the door panel can be between 65 mm and 82 mm.

Recess width 76.2 cm

The door panel thickness is 19 mm. The maximum door panel dimensions are based on a clearance of 3 mm, based on a single recess

The door panel thickness is 19 mm. The maximum door panel dimensions are based on a clearance of 3 mm, based on a single recess.

Planning principle for an individual appliance

Vertical cut Installation niche

The side walls of the installation niche must be completely even and flat along their entire depth.

Horizontal cut Installation niche

Installation niche for an individual cooling appliance (example: 762 mm wide)

In this example, the installation niche is formed by two tall cupboards (left and right) with an appropriate crown to the niche.

The cabinet door for the appliance comes in an identical design to the other kitchen fronts.

Requirements for the installation niche:

- The side walls of the installation niche must be completely even and flat along their entire depth
- Crown is at least 100 mm deep and made of a solid material (min. 16 mm thick)
- Width of the installation niche: 762 mm
- Depth of the installation niche: min. 610 mm

iergy Label	nnect Accessories

Cabinet front

Vertical cut Installation niche

The side walls of the installation niche must be completely even and flat along their entire depth.

Installation niche for a side-by-side solution

- 610 mm cooling appliance (right)
- 457 mm freezer (left)

In this example, the installation niche is formed by a tall cupboard (left) and a stable plinth (right) together with an appropriate crown for the niche.

The cabinet door for both appliances comes in an identical design to the other kitchen fronts.

Requirements for the installation niche:

- The side walls of the installation niche must be completely even and flat along their entire depth
- Crown is at least 100 mm deep and made of a solid material (min. 16 mm thick)
 Width of the installation niche:
- 610 mm + 457 mm = 1.067 mm
- Depth of the installation niche: min. 610 mm

Side-by-side solution 1

RF 471 / RC 492

Usability limitations: No limitation. Installation accessories: 1x RA 460 000 installation accessories for side-by-side installation (SxS)*. Notes: Door hinges on the outside.

Side-by-side solution 2

RW 414 / RB 472

Usability limitations: No limitation.

Installation accessories: 1x RA 460 000 installation accessories for side-by-side installation (SxS)*.

Notes: Door hinges on the outside. Change door hinge of RW.

If using the stainless steel fronts with a handle (installation accessories), select the correct door hinges for the RW.

Side-by-side solution 3

RW 414 / RY 492

Usability limitations: Not all doors can be opened at the same time. The left door of the RY may collide with the handle of the RW.

Installation accessories: 1x RA 460 000 installation accessories for side-by-side installation (SxS)*

Notes: Fitting the left RY doors at 90° is recommended. Change door hinge of RW. If using the stainless steel fronts with a handle (installation accessories), select the correct door hinges for the RW.

Combination of 3

RF 461 / RW 466 / RC 462

Usability limitations: The doors of RW and RC cannot be opened at the same time, but one after another.

Installation accessories: 2x RA 460 000 installation accessories for side-by-side installation (SxS)*.

Notes: All three appliances must be connected to each other before installation and pushed together into the installation niche.

Maximum distance

RF 471 / RF 463 / RW 466 / RC 472

Usability limitations: No limitation. All doors can be opened fully. Installation accessories: 2x RA 460 000 (SxS)*.

Notes: Two separate installation niches. Clearance is large enough to open all doors at the same time. Change door hinge of RW 466.

If using the stainless steel fronts with a handle (installation accessories), select the correct door hinges for the RW.

Distance ≥ 160 mm

RF 471 / RF 463 / RW 466 / RC 472

Usability limitations: The middle doors cannot be opened at the same time. Installation accessories: 2x RA 460 000 (SxS)*.

Notes: Two separate installation niches. The clearance between the two installation niches is greater than 160 mm. Change door hinge of RW.

If using the stainless steel fronts with a handle (installation accessories), select the correct door hinges for the RW.

Distance ≤ 160 mm

RF 471 / RF 463 / RW 466 / RC 472

Usability limitations: It may be necessary to open the middle doors one after the other, rather than at the same time.

Installation accessories: 2x RA 460 000 (SxS)*, 1x RA 460 013 (HE)*.

Notes: Two separate installation niches with a stable plinth between them. The clearance between the two installation niches is less than 160 mm. Therefore, an additional side heating element is required. Change door hinge of RW. If using the stainless steel fronts with handle (installation accessories), select the correct door hinges for the RW.

Combination of 4

RF 471 / RF 463 / RW 466 / RC 472

Usability limitations: If the middle door is open, then neither of the outer doors can be opened.

Installation accessories: 3x RA 460 000 installation accessories for side-by-side installation (SxS)*.

Notes: The appliances in the middle are connected side-by-side. Connecting the others will require additional side-by-side installation accessory. All four appliances must be connected to each other before installation and pushed together into the installation niche.

RF 471 / RF 463 / RW 466 / RC 472

Usability limitations: The middle doors cannot be opened at the same time. Installation accessories: 3x RA 460 000 installation accessories for side-by-side installation (SxS)*.

Notes: The appliances in the middle are connected hinge to hinge. All four appliances must be connected to each other before installation and pushed together into the installation niche. Change door hinge of RF 471 and RW 466. If using the stainless steel fronts with handle (installation accessories), select the correct door hinges for the RW. EB 333

Footnote:

*SxS Accessory for side-by-side installation. In an very humid environment always use the additional side heating element instead of the accessory for side-by-side installation. *HE Additional side heating element. Always required, if the distance between the appliances is greater than 16 mm or less than 160 mm.

ŝ

RB 289 300 With fresh cooling close to 0 $^\circ\text{C}$ Fully integrated Niche width 56 cm, Niche height 177.5 cm

Included in the price

- 2 bottle supports, maple wood
- 2 egg trays
- ice cube trav 1
- 2 ice packs

Special accessories

RA 430 100

Storage container with transparent lid, anthracite.

RA 238 030 Solid maple bottle support with magnetic connector, oiled.

RA 260 000

Heavy duty hinge support for a maximum door weight of 24 kg.

Vario fridge-freezer combination 200 series RB 289

- Interior with precision-fitted, solid aluminium elements in Gaggenau Light Bronze
- Extendable shelves and drawers
- Warm white and glare-free LED light _ 4 climate zones incl. 2 fresh cooling
- drawers close to 0 °C Height-adjustable, extendable safety glass shelves, set in solid
- aluminium profiles Cushioned door closing system allowing a soft and controlled door closure
- Easy-glide, fully extendable telescopic pull-out racks and a cushioned closing system allowing soft and controlled drawer closure
- Solid maple bottle supports with magnetic connector
- Total volume 223 litres

Handling

Electronic temperature control with digital display. Touch keys.

Technical features

Automatic defrosting with defrost water evaporation Cushioned door closing system from 20° door opening angle, integrated in door hinge. Open-door and malfunction alarm. Holiday mode.

Selected digital services

(Home Connect) Remote control and monitoring.

Please read additional information on Home Connect on page 411.

Cooling

Fast cooling. Temperature adjustable from +3 °C to +8 °C. 2 height-adjustable safety glass shelves, partly extendable. 1 frosted white glass shelf. 2 oiled, solid maple bottle supports with magnetic connector, can be increased to 5 supports per shelf. A total of 9 bottles (based on a 0.75) bottle) can be stored on one level using 5 bottle supports. The bottle supports are also suitable for storing champagne bottles and magnums. 1 large aluminium door rack for bottles. 1 aluminium door rack. Warm white interior lighting (3500 K) with integrated glare-free LED side lights. Volume 101 litres. Fresh cooling close to 0 °C

Drawers with solid aluminium handles and signature drawer front with a gradual frosted surface 1 fully extendable fresh cooling drawer close to 0 °C, illuminated. Humidity can be adjusted manually. Ideal for fruit and vegetables. 1 fully extendable fresh cooling drawer close to 0 °C, illuminated. Ideal for meat, fish and poultry. Volume 55 litres.

Freezina

No-frost technology with fast freezing. Temperature adjustable from -14 °C to -24 °C. 4-star freezer compartment. Drawers with solid aluminium handles and signature drawer front with a gradual frosted surface. Defrost assistance. Freezing capacity 7 kg/24 h. Storage time after a malfunction 8 h. 3 freezer drawers, 1 of which extra large. 2 safety glass shelves. Volume 67 litres.

Consumption data

Energy efficiency class D at a range of energy efficiency classes from A to G. Energy consumption 201 kWh/year. Noise level 37 dB (A) re 1 pW.

Planning notes

Flat hinge Door hinge right, reversible. Door opening angle of 115°, fixable at 90°. Max. door panel weight: Upper door 19 kg. Lower door 19 kg.

Please read additional planning notes on page 353.

Connection

Total connected load 0.090 kW. Connecting cable 2.3 m with plug.

RT 289 370

With fresh cooling close to 0 °C Fully integrated Niche width 56 cm, Niche height 177.5 cm

Included in the price

Freestanding fridge-freezer combination 200 series RY 295

- 3 climate zones incl. fresh cooling 0 °C
- 2 fresh cooling drawer 0 °C with 5 preset temperature settings between -2 °C and +4 °C
- 3 symmetrically split glass shelves, height adjustable
- Integrated ice maker with fixed inlet water connection
- Internal water dispenser for chilled water
- 5 preset brightness settings for the lighting
- Total volume 573 litres

Handling

Electronic temperature control with temperature display. Touch keys.

Technical features

Dynamic cold air distribution. Automatic defrosting with defrost water evaporation. Open-door and malfunction alarm. Child lock. Rest mode certified by Star-K. Holiday mode. Dark anthracite coloured top and side panels outside. Activated charcoal filter for water filter system with saturation indicator shown in display. Air filter.

Selected digital services

(Home Connect) Remote control and monitoring.

Please read additional information on Home Connect on page 411.

Cooling

Fast cooling. Temperature adjustable from +2 °C to +8 °C. 3 split safety glass shelves, all 6 half shelves with manual height adjustment. 1 integrated shelf. 2 large door racks for bottles. 4 door racks, 2 of which are height adjustable. 1 full width drawer. Internal water dispenser with fixed inlet water connection, integrated in left side wall. Glare-free LED lighting (5600 K). 5 preset brightness settings for the lighting, also via Home Connect. Interior stainless steel back wall. Volume 335 litres.

Fresh cooling 0 °C

2 fresh cooling 0 °C drawers. 5 preset temperature settings between -2 °C and +4 °C combined with humidity setting for fish and meat, fruit, vegetables, beverages, standard. Volume 67 litres.

Freezing

No-Frost technology with fast freezing. Temperature adjustable from -16 °C to -24 °C. 4-star freezer compartment. Freezing capacity 15 kg /24 h. Storage time after a malfunction 18.5 h. 3 fully extendable drawers. Volume 171 litres.

Ice maker

Integrated in the freezer compartment, with fixed inlet water connection. Can be switched off manually. Ice cube production approx. 1.5 kg/24 h. Removable ice storage container with approx. 3 kg capacity.

Consumption data

Energy efficiency class E at a range of energy efficiency classes from A to G. Energy consumption 333 kWh/year. Noise level 39 dB (A) re 1 pW.

Planning notes

Door opening angle of 118°, fixable at 90°. Wall recess of 25 mm necessary. If the water pressure exceeds 0.8 MPa (8 bar), connect pressure relief valve between water tap and hose set. To achieve the declared energy consumption, the attached spacers have to be used. The spacers increase the appliance depth by about 2.5 cm. Without the spacers, the appliance is fully functional but consumes slightly more energy.

Connection

Connecting cable 2.4 m with plug. Water inlet. Supply hose 3.0 m with 3/4 " connection. Water pressure 2 to 8 bar.

- A: Front is adjustable from 1830 to 1847, with front levelling feet fully extended.
 B: With handle
 C: Add 25 mm for fixed spacers on back
 D: Water connection position
- measurements in mm

If you install the appliance in a niche, adhere to the shown dimensions measurements in mm

measurements in mm

Ovens 200 series

/ario cooktops

Cooktops

Location

The appliance should be installed in a dry, well ventilated room. The location of the appliance should not be subject to direct sunlight or near a source of heat, such as an oven, a cooker or a radiator, etc.

If installation next to a heat source is unavoidable, observe the following minimum distances from the heat source:

- 3 cm to electric or gas ovens,
- 3 cm to electric or gas cooker,
- 30 cm to an oil-fired or solid-fuel cooker.

Side-by-side installation

Vario 200 and 200 series cooling appliances can be installed side by side in the following combinations, in their own kitchen units:

RW + RW

RC + RF (no other appliance next to RC model)

RW + RF (no other appliance next to RW model, except RW)

For all other combinations, a minimum clearance of 150 mm must be observed between appliances.

Clearance to adjacent furniture depending on the furniture panel thickness and radii

The panel thickness of customer-specific doors can be between 19 mm and 22 mm.

Recommended gap dimensions for flat hinges

F = Furniture panel thickness

R = Radius

X = Gap dimension

The gap dimensions recommended in the table must be adhered in order to ensure that the appliance door does not collide with anything when it is opened, and to avoid causing damage to furniture panels.

measurements in mm

Door panels

Maximum permissible door panel weight

Recess height	Number of doors	Max. permissible door panel weight
178 cm, Vario 200, 200 series	1	22 kg
178 cm, Vario 200, 200 series	2	19 kg each
178 cm, Vario 200, 200 series + RA 260 000	1	27 kg
178 cm, Vario 200, 200 series + RA 260 000	2	24 kg each
82 cm, 200 series	1	19 kg
178 cm, 123 cm, 200 series wine	1	20 kg

If the maximum permissible weight is exceeded, this may damage or impair the function of the hinge.

Base area

Important!

Poor ventilation leads to damage of the appliance!

The appliance air inlet opening in the base area of the fitted kitchen must not be covered under any circumstances.

A cross-section of at least 200 cm² must be provided for the air inlet opening.

Dimensions of the special accessories - door panel frames.

The following diagrams show the basic dimensions of the special accessories door front frames for RW 282 and RW 222.

The dimensions of the doors shown are designed for the following basic specifications:

- Panel thickness: 19 mm _
- _ Gap: 3 mm

These specifications provide you with a good starting point for a variety of kitchen designs.

Important!

The following diagrams are not a substitute for detailed designs. Compliance with specified requirements relating to kitchen design is essential.

A: 52.5

The door panel thickness is 19 mm. The maximum door panel dimensions are based on a clearance of 3 mm, based on a single recess.

Energy efficiency class G at a range of energy efficiency classes from A to G. Energy consumption 146 kWh/year. Noise level 35 dB (A) re 1 pW.

Planning notes

Flat hinge. Door hinge right, reversible. Height-adjustable feet. Door opening angle fixable at 95°. For integration next to a side wall a clearance of 150 mm hinge side is necessary. The mains socket needs to be planned outside the built-in niche. No transport/operation above 1500 m sea level.

Connection

Total connected load 0.130 kW. Connecting cable 2.0 m with plug.

ŝ

Accessories and special accessories for cooling appliances

RA 050 220

RA 430 100

anthracite

RA 493 060

RA 430 000

1 piece.

Replacement activated charcoal air filter

Storage container with transparent lid,

Presenter in oak wood and aluminium in anthracite for single bottle display

Screw hole cover set. 8 pieces.

RA 448 220

Ice storage container, small For installation with a door opening angle of 90° the delivered ice storage container must be exchanged for the small ice storage container. This must be done prior to fixing the door.

RA 492 160

Removable shelf with oak wood frame Suitable for decanters and open bottles. For 45.7 cm wide appliances.

RA 492 660

Removable shelf with oak wood frame Suitable for decanters and open bottles. For 61 cm wide appliances.

RA 498 140

Bottle support in oak wood for convenient storage of bottles on the division plate For 45.7 cm wide appliances.

RA 498 640

Bottle support in oak wood for convenient storage of bottles on the division plate For 61 cm wide appliances.

RA 238 030 Solid maple bottle support with

magnetic connector, oiled

Stainless steel door panel with handle For 45.7 cm wide appliances, panel thickness 19mm.

RA 428 110

Stainless steel door panel, handleless For 45.7 cm wide appliances, panel thickness 19 mm.

RA 421 111 Stainless steel door panel frame with handle For 45.7 cm wide appliances, left-hinged, panel thickness 19 mm.

RA 421 112

Stainless steel door panel frame with handle For 45.7 cm wide appliances, right-hinged, panel thickness 19 mm.

RA 428 111 Stainless steel door panel frame,

handleless For 45.7 cm wide appliances, panel thickness 19 mm.

RA 421 610

Stainless steel door panel with handle For 61 cm wide appliances, panel thickness 19 mm.

RA 428 610

Stainless steel door panel, handleless For 61 cm wide appliances, panel thickness 19 mm.

RA 421 611 Stainless steel door panel frame with handle For 61 cm wide appliances, left-hinged, panel thickness 19mm.

Accessories and special accessories for cooling appliances

Stainless steel door panel frame with For 61 cm wide appliances, right-hinged, panel thickness 19 mm.

RA 428 611

RA 421 612

handle

Stainless steel door panel frame, handleless For 61 cm wide appliances, panel thickness 19 mm.

RA 421 710

Stainless steel door panel with handle For 76.2 cm wide appliances, panel thickness 19 mm.

RA 428 710

Stainless steel door panel, handleless For 76.2 cm wide appliances, panel thickness 19 mm.

RA 421 911 Stainless steel door panel with handle For 91.4 cm wide appliances, panel thickness 19 mm.

RA 428 911

Stainless steel door panel, handleless For 91.4 cm wide appliances, panel thickness 19 mm.

RA 421 712

Stainless steel door panel with handle For RB 472, panel thickness 19 mm.

RA 428 712

Stainless steel door panels, handleless For RB 472, panel thickness 19 mm.

Stainless steel door panels with handles For RB 492, panel thickness 19 mm.

RA 428 910

Stainless steel door panels, handleless For RB 492, panel thickness 19 mm.

RA 421 912 Stainless steel door panels with handles For RY 492, panel thickness 19mm.

RA 428 912

Stainless steel door panels, handleless For RY 492, panel thickness 19 mm.

RA 422 610

Stainless steel door panel with handle For RF 463, panel thickness 19 mm.

Stainless steel door panel, handleless For RF 463, panel thickness 19 mm.

RA 221 311

Stainless steel door panel with handle For RW 282, panel thickness 19 mm.

RA 221 211

Stainless steel door panel with handle For RW 222, panel thickness 19mm.

Accessories and special accessories for cooling appliances

RA 425 110

Handle bar, stainless steel, long With 3 mounts, length 1.131 mm, height 49 mm, drilling distance between each mount 554 mm.

RA 425 710

Handle bar, stainless steel, short. For RB 472 with 2 mounts, length 658 mm, height 49 mm, drilling distance between the mounts 637 mm

RA 425 910

Handle bar, stainless steel, short For RB/RY 492, with 2 mounts, length 810 mm, height 49 mm, drilling distance between the mounts 787 mm.

RA 450 012

Activated charcoal filter for water filter system. For RB, RY, RF.

RA 460 000

Accessory for side-by-side installation. Not required if appliances are installed more than 160 mm apart from each other. Included in delivery for RF and RW.

RA 460 013

Additional side heating element 230 V. Required if appliances are installed with a distance greater than 16 mm and less than 160 mm next to each other and for all built-in situations in a very humid environment. Not required if appliances are installed more than 160 mm apart from each other.

RA 460 020

Connecting element for vertically split appliance fronts (for a flush front)

RA 460 030

Connecting element for vertically split fronts (for fridge-freezer combination)

RA 464 111 Ventilation grille stainless steel

For 45.7 cm wide appliances.

RA 464 113 Ventilation grille stainless steel For 45.7 cm wide appliances with

integrated water filter. RA 464 611

Ventilation grille stainless steel For 61 cm wide appliances.

RA 464 616

Ventilation grille stainless steel For 61 cm wide appliances with integrated water filter.

RA 464 617

Ventilation grille stainless steel For RF463 with integrated water filter, right-hinged.

RA 464 618

Ventilation grille stainless steel For RF463 with integrated water filter, left-hinged.

RA 464 711 Ventilation grille stainless steel For 76.2 cm wide appliances

RA 464 714 Ventilation grille stainless steel For 76.2 cm wide appliances with integrated water filter.

RA 464 713 Ventilation grille stainless steel For RB 472.

RA 464 913 Ventilation grille stainless steel For RB/RY 492.

RA 464 911 Ventilation grille stainless steel For 91.4 cm wide appliances

RA 420 010 Door lock for RW 414 and RW 466

RA 097 600

Accessory for side-by-side installation of two under-counter wine climate cabinets

RA 260 000

Heavy duty hinge support For RC/RF/RT 28* maximum door weight 27 kg. For RB 28* maximum door weight 24 kg. RB 28* requires 2 x RA 260 000.

RA 491 161

Fully extendable bottle trays with hidden telescopic rails in oak wood and solid aluminium in anthracite For 45.7 cm wide appliances.

RA 491 661

Fully extendable bottle trays with hidden telescopic rails in oak wood and solid aluminium in anthracite For 61 cm wide appliances.

RA 423 140 Side trims, long

RA 423 340 Side trims, 2 pieces, for RY and RB

• Standard. – Not available. • Special accessory.

¹ Effective consumption depends on the use/location of appliance.

² The appliance is fully functional within the room temperature limits defined in the following climate classes: SN-ST (+10 °C to +38 °C), SN-T (+10 °C to +43 °C).
 ³ The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country.

• Standard. - Not available. • Special accessory.

¹ Effective consumption depends on the use/location of appliance.

² The appliance is fully functional within the room temperature limits defined in the following climate classes: SN-ST (+10 °C to +38 °C), SN-T (+10 °C to +43 °C).

³ The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country.

DF 480 101 Fully integrated Height 81.5 cm

A G B

Included in the price

1 baking tray spray head

- 2 GN container inserts
- 1 holder for long-stemmed glasses

1 stainless steel trim kit

Installation accessories

DA 021 000 Hinge for all fully integrated diswashers GZ 010 011 Extension for water inlet and outlet (2 m long)

Special accessories DA 041 160

Cutlery drawer with smooth running rails 3rd loading level above the upper basket. For large pieces of cutlery, cooking utensils and espresso cups.

13 place setting capacity with all 3 levels. DA 042 030

Silvercare cartridge for all dishwashers DA 043 000

Holder for long-stemmed glasses Offers safe positioning for up to four long-stemmed glasses during the dishwashing process and ensures an optimal cleaning result.

For positioning in the lower basket. DA 045 061

3rd basket With smooth running rails For 86.5 cm high dishwashers 3rd loading level above the upper basket. For small bowls, cups and cooking utensiles.

Movable knife shelf.

Dishwasher 400 series DF 481/DF 480

- Optimal protection for sensitive glassware by low temperature drying with zeolite, elaborated basket design and intelligent water softening
- 8 programmes with aqua sensor and 4 options, such as Power for cleaning and drying dishes from 57 minutes and Intensive Plus for adjusting cleaning areas in the lower basket
- Flexible basket system with smooth running rails on all levels and cushioned closing of the upper and lower basket
- Perfectly illuminated interiorPush-to-open function for perfect
- integration into handleless furniture fronts
- Remaining time projection onto the kitchen floor
- Very quiet: 43 dB

Handling

TFT display indicating remaining or end time, refill for salt and rinsing agent, inflow of water. Touch key operation. Flexible cycle time reduction, even during an active cycle. Personalisation function for storing individual combinations of programmes. Information key with use indicators. Time delay up to 24 hours. Visual and acoustic end of programme indicator. Remaining time projection.

Technical features

Perfectly illuminated interior. Glass protection with zeolite. Aqua sensor. Load sensor. Detergent recognition. Regeneration electronics. Heat exchanger. Continuous flow heater. Triple filter system. Soft lock. Aqua stop.

Selected digital services

(Home Connect) Programme Intelligent for adapting a cycle based on user feedback. Programme assistant. Drying assistant for optional door opening at the end of the programme. Temporary noise reduction. Downloadable programmes.*

Please read additional information on Home Connect on page 411.

Programmes

8 programmes: Auto $35 \degree C - 45 \degree C$. Auto $45 \degree C - 65 \degree C$. Auto $65 \degree C - 75 \degree C$. Intensive $70 \degree C$. Eco $50 \degree C$. Night programme. Quick wash $45 \degree C$ ($35 \min$). Personalisation function (default setting: Pre-rinse). 4 options: Intensive Plus. Power. Half Load. Hygiene.

Machine Care.

Interior

Flexible basket system with smooth running rails on all levels and cushioned closing of the upper and lower basket.

Upper basket: Over extension. Optional extra cleaning area by activating additional spray nozzles. Rackmatic with 3 levels, adjustable in height up to 5 cm. 6 folding spines. 4 folding racks for optimal protection of glass.

Lower basket: Motorised spray arm. 8 folding spines. 2 folding racks for optimal protection of glass. Dividable glass support. Cutlery basket.

Maximum dish sizes (upper/lower basket) for 86.5 cm high dishwashers: 29/28, 26.5/30.5 or 24/34 cm respectively.

Maximum dish sizes (upper/lower basket) for 81.5 cm high dishwashers: 27/25, 24.5/27.5 or 22/31 cm respectively.

12 place setting capacity. Maximum glass loading capacity 23 wine glasses.

Consumption data

Energy efficiency class B at a range of energy efficiency classes from A to G. From 9.51 water. From 0.626 kWh. Noise level 43 dB (re 1 pW).

Planning notes

Height-adjustable feet. Appliance plinth recess 100 mm (see drawing). To display the remaining time projection, a minimum plinth protrusion is required (40 mm + thickness of the furniture front). The maximum plinth height must be reduced by 30 mm to provide an optimal display of the remaining time projection. Rear feet adjustable at front. Door weight up to 10/8.5 kg. Door panel dimension dependent on plinth height of kitchen furniture. Installation and usage also with furniture handle possible. The push-to-open function remains active.

Please read additional planning notes on page 392 – 399.

6 programmes: Auto 35 °C - 45 °C. Auto 45 °C - 65 °C. Auto 65 °C - 75 °C. Eco 50 °C. Quick wash 45 °C (35 min.). Personalisation function (default setting: Pre-rinse).

3 options: Intensive. Power. Half Load.

Machine Care.

Interior

Flexible basket system with smooth running rails on all levels.

Upper basket:

Over extension. Optional extra cleaning area by activating additional spray nozzles. Rackmatic with 3 levels, adjustable in height up to 5 cm. 6 folding spines. 4 folding racks for optimal protection of class.

Lower basket: 8 folding spines. 2 folding racks for optimal protection of glass. Dividable glass support. Cutlery basket.

Maximum dish sizes (upper/lower basket) for 86.5 cm high dishwashers: 29/28, 26.5/30.5 or 24/34 cm respectively.

Maximum dish sizes (upper/lower basket) for 81.5 cm high dishwashers: 27/25, 24.5/27.5 or 22/31 cm respectively.

12 place setting capacity. Maximum glass loading capacity 23 wine glasses.

Consumption data

Energy efficiency class B at a range of energy efficiency classes from A to G. From 9.51 water. From 0.725 kWh. Noise level 43 dB (re 1 pW).

Planning notes

Height-adjustable feet. Appliance plinth recess 100 mm (see drawing). To display the remaining time projection, a minimum plinth protrusion is required (40 mm + thickness of the furniture front). The maximum plinth height must be reduced by 30 mm to provide an optimal display of the remaining time projection. Rear feet adjustable at front. Door weight up to 10/8.5 kg. Door panel dimension dependent on plinth height of kitchen furniture. Installation and usage also with furniture handle possible. The push-to-open function remains active.

Please read additional planning notes

on page 392 – 399.

Special accessories DA 041 160

Cutlery drawer with smooth running rails 3rd loading level above the upper basket. For large pieces of cutlery, cooking utensils and espresso cups.

13 place setting capacity with all 3 levels. DA 042 030

Silvercare cartridge for all dishwashers DA 043 000

Holder for long-stemmed glasses Offers safe positioning for up to four long-stemmed glasses during the dishwashing process and ensures an ontimal cleaning result.

For positioning in the lower basket. DA 045 061

3rd basket

With smooth running rails For 86.5 cm high dishwashers 3rd loading level above the upper basket. For small bowls, cups and cooking utensiles. Movable knife shelf.

Dishwasher 200 series DF 271/DF 270

- Optimal protection for sensitive glassware by low temperature drying with zeolite, elaborated basket design and intelligent water softening
- 6 programmes with aqua sensor and 3 options, such as Power for cleaning and drying dishes from 57 minutes and Intensive for particularly thorough cleaning in the lower basket
- Flexible basket system with smooth running rails on all levels
- Bright interior lighting
- Push-to-open function for perfect integration into handleless furniture fronts
- Flexible hinge for reduced plinth height as of 50 mm
- Lateral Info-Light
- Very quiet: 43 dB

Handling

TFT display indicating remaining or end time, refill for salt and rinsing agent, inflow of water. Touch key operation. Flexible cycle time reduction, even during an active cycle. Personalisation function for storing individual combinations of programmes. Information key with use indicators. Time delay up to 24 hours. Visual and acoustic end of programme indicator. Lateral Info-Light.

Technical features

Bright interior lighting. Glass protection with zeolite. Aqua sensor. Load sensor. Detergent recognition. Regeneration electronics. Heat exchanger. Continuous flow heater. Triple filter system. Soft lock. Aqua stop.

Selected digital services (Home Connect)

Downloadable programmes.* Programme assistant. Temporary noise reduction. Drying assistant for optional door opening at the end of the programme.

Please read additional information on Home Connect on page 411.

Programmes

6 programmes: Auto $35 \degree C - 45 \degree C$. Auto $45 \degree C - 65 \degree C$. Auto $65 \degree C - 75 \degree C$. Eco $50 \degree C$. Quick wash $45 \degree C$ (35 min.). Personalisation function (default setting: Pre-rinse).

3 options: Intensive. Power. Half Load.

Machine Care.

Interior

Flexible basket system with smooth running rails on all levels.

Upper basket: Over extension.

Optional extra cleaning area by activating additional spray nozzles. Rackmatic with 3 levels, adjustable in height up to 5 cm. 6 folding spines. 4 folding racks for optimal protection of glass.

Please read additional planning notes on page 392 – 399.

plinth height of kitchen furniture.

Connection

Connection dimensions for a 45 cm wide dishwasher

() values with extension kit

Additional planning notes for standard dishwashers (without flexible hinge)

For niche heights from 815 to

855 mm, in most cases, the 81.5 cm high dishwasher must be planned, regardless of the plinth height.

For niche heights from 885 to

925 mm, in most cases, the 86.5 cm high dishwasher must be planned, regardless of the plinth height.

If the niche height amounts to 865 or 875 mm, please note:

Whether the 81.5 cm high dishwasher or the 86.5 cm high dishwasher can be used here depends on the plinth height.

For dishwasher with remaining time projection, the maximum plinth height must be reduced by 30 mm to provide an optimal display.

For niche heights from 815 to 860 mm, in most cases, the 81.5 cm high dishwasher must be planned, regardless of the plinth height.

For niche heights from 880 to 925 mm, in most cases, the 86.5 cm high dishwasher must be planned, regardless of the plinth height.

If the niche height amounts between 865 and 875 mm, please note: Whether the 81.5 cm high dishwasher or the 86.5 cm high dishwasher can be used here depends on the plinth height.

If the installation of a dishwasher with **flexible hinge** is necessary or not depends on several factors.

The door panels cannot be used with dishwashers with flexible hinge.

Additional planning notes - tall unit installation of dishwashers with flexible hinge

Tall unit installation of dishwashers with flexible hinge – **without slanted** drawer panel

The table contains the gap size required between the kitchen furniture door panel and drawer panel with reference to niche height, plinth height and panel thickness when using a standard kitchen furniture door panel for dishwashers installed below worktops.

Niche height (mm)	Panel thickness (mm)	;						Plinth he	eight (mm)

Additional planning notes - tall unit installation of dishwashers with flexible hinge

Tall unit installation of dishwashers with flexible hinge – **with slanted** drawer panel

The table contains the gap size required between the kitchen furniture door panel and drawer panel with reference to niche height, plinth height and panel thickness when using a standard kitchen furniture door panel for dishwashers installed below worktops.

(mm)	Panel thickness (mm)	5						Plinth he	ight (mm))
× /		50	55	60	65	70	75	80	85	90

Dishwashers | Washing machine

Accessories and special accessories for dishwashers

Flexible basket system

Flexible basket system with smooth running rails on all levels and cushioned closing of the upper and

Upper basket

lower basket.

For more flexibility and easier handling when loading and unloading the dishwasher.

6 folding spines.

4 folding racks for optimal protection of glass. With over extension, optional extra cleaning area, smooth running rails and cushioned closing as well as rackmatic with 3 levels, adjustable in height up to 5 cm. Handle for easier removal of the upper basket.

Lower basket

8 folding spines. 2 folding racks for optimal protection of glass. Dividable glass support. Cutlery basket. With smooth running rails and cushioned closing. Handle for easier removal of the lower basket.

Configuration of flexible basket system depending on model.

DA 020 011

Stainless steel trim kit for all 81.5 cm high dishwashers Set of 2, for left and right. To cover the gap between appliance and adjacent furniture and for better fixation of the appliance in the niche. The white frame is replaced by a stainless steel trim kit. W x D in cm: 2.3 x 2.3.

Height 62.2 cm. DA 020 111

Stainless steel trim kit for 86.5 cm high dishwashers Set of 2, for left and right. To cover the gap between appliance and adjacent furniture and for better fixation of the appliance in the niche. The white frame is replaced by a stainless steel trim kit. W x D in cm: 2.3 x 2.3. Height 67.2 cm.

DA 020 041

Stainless steel trim kit for 81.5 cm high and 45 cm wide dishwashers Set of 2, for left and right. To cover the gap between appliance and adjacent furniture and for better fixation of the appliance in the niche. The white frame is replaced by a stainless steel trim kit. W x D in cm: 2.3 x 2.3. Height 62.2 cm.

DA 021 000

Hinge for all fully integrated diswashers Installation solution for all dishwashers with a niche height of up to 92 cm and split furniture panel.

The hinge is fastened to the plinth of the appliance and the lower part of the split furniture panel is mounted onto it. Height upper part of the split furniture panel:

. 64.5 - 68 cm for 81.5 cm high dishwashers. 69.5 - 73 cm for 86.5 cm high dishwashers.

DA 041 160

Cutlery drawer with smooth running rails 3rd loading level above the upper basket. For large pieces of cutlery, cooking utensils and espresso cups. 13 place setting capacity with all 3 levels.

Ovens 400 series

Ovens 200 series

Vario cooktops

DA 041 061

Cutlery drawer 3rd loading level above the upper basket. For large pieces of cutlery, cooking utensils and espresso cups. 14 place setting capacity with all 3 levels.

DA 045 060

3rd basket For 86.5 cm high dishwashers 3rd loading level above the upper basket. For small bowls, cups and cooking utensiles. Movable knife shelf.

DA 045 061

3rd basket With smooth running rails For 86.5 cm high dishwashers 3rd loading level above the upper basket. For small bowls, cups and cooking utensiles. Movable knife shelf.

DA 042 030

Silvercare cartridge for all dishwashers Made of aluminium to protect silverware from corrosion. Easy use of cartridge in the cutlery basket. W x H x D in cm: 5.5x20.2x4.1.

DA 043 000

Holder for long-stemmed glasses Offers safe positioning for up to four long-stemmed glasses during the dishwashing process and ensures an optimal cleaning result. For positioning in the lower basket.

GH 045 010

Handle bar with 2 mounts, stainless steel, length 45 cm, height 49 mm, drilling distance 427 mm

GZ 010 011

Extension for water inlet and outlet (2 m long).

WM 260 164

Free-standing, slide-under or stackable Width 60 cm, height 84.8 cm

Special accessories WM Z23 81 Aquastop extension for cold water inlet Washing machine WM 260

- Intelligent dosage system iDos 2.0 for liquid detergent and softener for a perfect washing result
- 10 kg drum with interior lighting Top-up function
- Dynamic Wash System: innovative washing technology for increased
- cleaning performance
 Combines perfectly with dryer
 WT 260 110

Handling

Automatic programmes: Perfect washing results at the touch of a button. Illuminated rotary knob with integrated On-Off switch. Touch key operation. TFT display with clear text and symbols. Loading indicator with dosage recommendation. Programme sequence and remaining time display. Time delay up to 24 hours. Multiple signal tones.

Technical features

Aqua sensor. Aqua stop. Flow-through sensor. Anti-stain automatic. Continous automatic load adjustment. Foam detection system. Spin speed selection from 400 to 1600 rpm. Top-up function. Dynamic Wash System technology for increased cleaning performance. Automatic stabilisation. Anti-crease system. Child lock.

Selected digital services (Home Connect)

Smart Energy Management. Smart Dry (Washing machine automatically selects correct dryer program). Remote control and monitoring.

Please read additional information on Home Connect on page 411.

Programmes

Eco 40-60 Cottons Cottons Color. Easy Care. Quick/Mix. Delicates/Silk Automatic Automatic Soft. Dark Wash. Sports. Super 15/30. Wool. Memory. Additional Programmes: Shirts, Allergy Plus, Drum Clean, Single Rinse, Spinning, Drain. Options: Remote-Start, Intensive Plus, Speed Perfect, Rinse Plus, Less ironing, Rinse Hold, Water Plus, Silent Wash, Prewash, Stains.

Features

iDos 2.0 for fully automatic dosing of liquid detergent and softener. Volume capacity from 1 to 10 kg. Drum interior lighting. Powder detergent drawer with automatic cleaning mode after every wash cycle. Stainless steel drum with wave structure. Innovative BLDC motor technology for more performance, higher durability as

more performance, higher durability as well as less energy consumption and noise.

Consumption data

Energy efficiency class C at a range of energy efficiency classes from A to G. Water consumption 491. Energy consumption 67 kWh per 100 cycles

Planning notes

Left-hinged.

Large porthole with 180 ° opening angle. Height-adjustable feet. Height for slide-under installation: 85 cm. Distance from appliance to cabinet min. 5mm left, right and top. Installation below 4000m sea level. Stackable under dryer WT 260 110 in combination with special accessory. With pull-out shelf 17001528, without

Connection

pull-out shelf 17001527.

Total connected load 2.3 kW. Connection cable 160 cm with plug. Water connection with 3/4" screw joint.

measurements in mm

Energy Labels

By using energy-saving home appliances, you save valuable resources as well as money. That's why you should consider low energy and water consumption values when you purchase a home appliance.

Technological developments have resulted in many more products being able to attain an A+ or better rating. User behaviour has also changed, which is why new rescaled labels have been created that take this into account for washing machines, washer-dryers, dishwashers, cooling appliances and wine coolers. The Energy Label for ovens, cooktops and extractors will remain the same.

For more information on energy labels, visit: www.gaggenau.com

New rescaled energy label for washing machines, washer-dryers, dishwashers, cooling appliances and wine coolers.

Example Key for a fridge-freezer combination

- 1 QR code
- 2 Energy efficiency class
 - Energy consumption in kWh/year (measured under new standard conditions)
 - Noise emissions expressed in dB(A) re 1 PW and noise emission class
- 5 Total volume of all freezer compartments
- 6 Total volume of all refrigerator compartments

Energy label for oven, cooktops, extractors.

Key

- 1 Energy efficiency class
- Energy consumption in kWh/year (measured under standard conditions)

The extraordinary is connected.

Make use of digital services via Home Connect.*

Discover how Home Connect can be used to enhance the chef's life and the appliances' use.

The difference is Gaggenau.

This is the beginning of the future of cooking. Aided by a digital device, the private chef can, for instance, preheat the oven, turn on ventilation, start the dishwasher, download digital user manuals and have a technician run a diagnostic check, all remotely.

Integrating into different home managements systems ensures the kitchen remains the heart of the digital home. The private chef can ask e.g. Amazon Alexa to prepare a cup of coffee and turn on the ventilation while checking remaining time of the oven.

– Connect:

Remotely control** and monitor. Enable remote diagnosis by an online technician.

– Access:

Download user manuals and utilise our partnering network.

Integration:

Compatible with different home management systems.

This is just the start. Explore the possibilities at home-connect.com.

- **Fridge-Freezer:** Control your energy consumption: change your appliances to Eco mode or Holiday mode via the App.
- 2 Wine climate cabinet: Using the App bring the chosen wine to serving temperature as you make your way home.
- **Washing machine:** Communicating via Home Connect, the dryer chooses the programme best suited to the clothes the Washing machine has just cleaned.
- **Oven:** Entertain in the garden and have your mobile phone alert you when the hors d'oeuvres are done.
- 5 Fully automatic espresso machine: Prepare your appliance for your morning coffee by turning it on with your mobile device.
- 6 **Combi-steam oven:** Send the sous-vide recipe settings (temperature, time and humidity) to your oven.
- Cooktop: Rather than adjust the ventilation separately, link it through Home Connect and control it from the cooktop.
- 8 **Dishwasher:** Ask the app what setting would work best on your delicate glasses and heavily soiled pots and pans.

Download app here:

Apple App Store (iOS)

- * Home network integration for digital services (Home Connect) wireless via WiFi. The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country. For further information please check: home-connect.com. Home Connect is a service of Home Connect GmbH.
- ** Not applicable for cooktops. Cooktops are not intended for unattended use cooking process must be supervised.

Ovens 200 series

The Gaggenau Gastronorm system

The Gastronorm system provides the basis for cookware in the professional kitchen. It enables a smooth continuum from the preparation and cooking stages right through to serving at the table and storage. The Gastronorm inserts from Gaggenau have been adapted to match our cooling appliances, our induction cooktops, our Combi-steam and steam ovens, our ovens as well as our dishwashers.

Prepare.

To prepare in combination with kitchen sinks in the Gastronorm format.

Keep fresh.

To keep fresh in Gaggenau cooling appliances.

Cook.

Accessories in the Gaggenau Gastronorm system

For usage in the various Gaggenau appliances the following accessories in the Gaggenau Gastronorm system are available.

Gastronorm insert GN 114/124/144/154

These high-walled, sturdy inserts made from hygienic stainless steel are ideal for cooking with steam and equally practical for storage in the refrigerator or serving at the table. They are dishwasher-safe. For cooking several meals simultaneously, the cooking inserts for Combisteam and steam ovens in the GN 2/3 format can be combined as required with smaller inserts that are available as special accessories in the GN 1/3 format.

GN 114 130
